SELECTED PRODUCT WORK

Gutsy, AI-Powered Health Management - Product & Visual Designer • UX & UI | 2026

Designed a mobile health-management concept helping people living with chronic digestive conditions understand relationships among symptoms, food, stress, sleep, hydration, and other everyday factors.

- Conducted user interviews and synthesized challenges around fragmented tracking, cognitive burden, and identifying meaningful patterns.
- Designed a mobile-first experience combining conversational AI, dashboards, personalized insights, and flexible voice and text logging.
- Developed user flows, wireframes, interactive prototypes, visual systems, data visualizations, and high-fidelity interfaces.
- Iterated through usability feedback to improve clarity, trust, ease of logging, and communication of health patterns.

SlotSpot, Smart Urban Parking - Product & Visual Designer • UX & UI | 2025

Designed an end-to-end mobile parking experience intended to reduce the time, cost, and stress involved in finding parking in high-demand urban areas.

- Investigated parking decisions across availability, price, walking distance, vehicle fit, safety, and changing street conditions.
- Translated research into personas, journey maps, opportunity prioritization, and user flows; explored mobile, AR, and heads-up display (HUD) concepts, then designed and tested core parking flows to refine hierarchy, navigation, accessibility, and interactions.
