## About This Analysis

LISEP Local Analysis provides localized economic metrics for the largest Metropolitan Statistical Areas (MSAs) in the United States. LISEP's True Rate of Unemployment (TRU) and TRU Out of the Population (TRU OOP), True Living Cost (TLC) and True Weekly Earnings (TWE) are tailored to each MSA and combined with other metro-specific data to offer a more accurate and detailed understanding of how each MSA is performing. LISEP Local Analysis allows us to compare and contrast MSAs against each other, neighboring areas and the country as a whole.

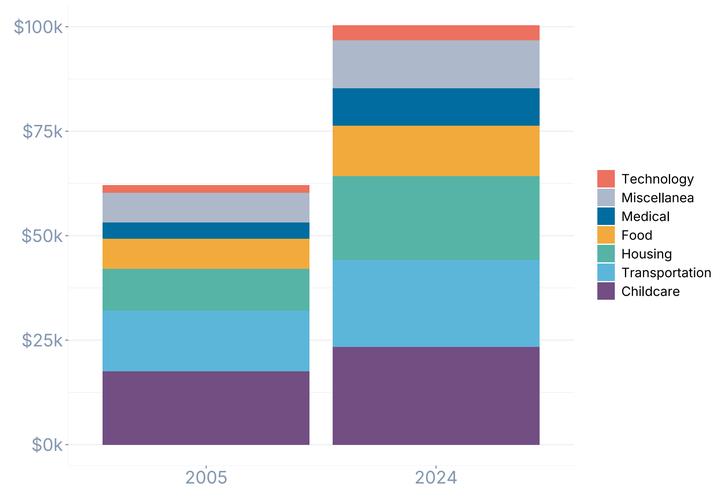

## True Weekly Earnings

The median earner in Las Vegas-Henderson-Paradise, NV gained **0.5%** in purchasing power since 2005 (in 2024 dollars).

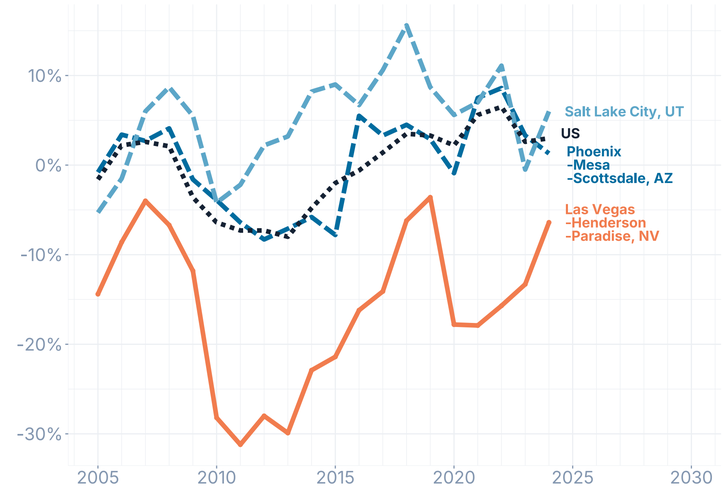

## Cost of Necessities

The total costs of necessities for a four-person household **increased 61.6%** from $62,072 in 2005 to **$100,336** in 2024.
