

Link Mobility integration

Send SMS messages directly through LINK Mobility within the Synerise platform, ensuring reliable delivery, full transparency, and measurable performance.

How does it work

LINK Mobility is a leading European provider of mobile and CPaaS solutions for businesses. It specializes in enabling secure, scalable, and omnichannel communication between companies and their customers through services like SMS. With LINK Mobility connected, you can easily orchestrate SMS campaigns as part of your omnichannel communication strategy - reaching customers wherever they are, with messages that matter.

Key Benefits

Easy integration

Send SMS messages directly via LINK Mobility through your Synerise account.

Effective monitoring

Monitor message delivery status and performance in real time, ensuring every communication reaches its destination.

Results tracking

Access detailed insights on SMS campaign results—track deliveries, response rates, and message engagement.
