Workflow status

Automation-generated campaigns in
the Communication module now come with full context at a glance. View workflow details, including status, creation and update info, author, and more, directly within the list view, along with
a quick link that opens the workflow itself.

Why its important

This enhancement streamlines access to essential details and cuts down time spent searching for related automations. Managing automated campaigns often means switching between multiple views or tools to confirm details, trace authorship, or check status. With this update, your campaign and workflow data become more transparent and connected.

Key Benefits

Faster navigation

Jump directly from campaign lists to workflows with one click

Transparency

See workflow authors, status, and timestamps at a glance

Enhanced efficiency

Reduce context switching and focus on optimizing performance
