

A modern home lift with glass doors is installed in a white hallway. The lift is framed by a white wall and has a black base. The interior of the lift is visible, showing a light-colored floor and a glass railing. The hallway is decorated with a white console table, a vase of white flowers, and a black and white patterned chair. A framed picture hangs on the wall to the right of the lift. The floor is white with a black decorative border.

E-MOTION HOME LIFT

ACUTE

ELEVATORS

E-Motion HOME LIFT

Our flagship home lift offers the ultimate in customisation and finishing options. It is unmatched in its category and can be fully customized to meet the specific needs of the client.

SPEED: 0.15 M/S

The e-motion home lift delivers a safe, smooth and comfortable user experience travelling between floors. In compliance with the Machinery Directive 200/42/UKCA

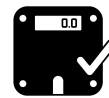

LOW PIT & HEADROOM REQUIREMENTS

With a pit depth requirement of only 130mm* or ramp can be provided. Minimum headroom of only 2250mm* from the top floor level, a market leader.

TRACTION AND HYDRAULIC OPTIONS

Both drive options are available, we work with you to offer the best solution for both the user and the property requirements.

RATED LOAD UP TO 500kg*

The lifting capacity is determined by the car size, different drive options and finishes allows us to optimise the load for each project.

TRAVEL UP TO 20M

Suitable for most residential applications, with fast and simple installation.

MEETS ALL LEGISLATION REQUIREMENTS

The e-motion home lift complies with all the latest safety standards, type tested and UKCA marked.

FREEDOM OF DESIGN.

Its adaptability that makes the e motion Home Lift unique, not just in its exceptional ride quality, but in the unprecedented collection of material finishes, each tailored to match your design aspirations and the aesthetic of any home. With decades of experience working with Architects and Interior designers we have assembled a variety of finishes that give your property a fashionable, contemporary lift while blending in with its style and individuality.

CONTEMPORARY, ELEGANT CABINS

Starting with a blank canvas we realise your vision using premium material combinations.

SELECTION OF PUSH AND TOUCH CONTROLS

We provide several control panels that can be customised with tactile psychical buttons that have a brushed radial finish. In addition, we can add touch controls to our panels, hidden behind a sheet of superior glass.

INDUSTRY LEADING CONTROL SYSTEM

incorporating low-energy, silent drive technology to assure every trip is as pleasurable and comfortable as possible. Even setting up your home elevator to respond to voice and app commands is now possible with modern, smart connectivity.

STRUCTURES FOR INDOOR AND OUTDOOR USE

We offer passenger lift structures when brick construction is not accessible, they offer stability and are carefully designed and certified to be structurally compliant with the lift loads, stresses and space requirements of the building. A selection of framing and cladding options including various glass types and finishes are available. Our lift structures can provide 360° panoramic viewing giving an emotional connection to the surrounding architecture. Beside adding a beautiful architectural feature, we ensure your lift is safe and reliable and complies with all current legislations. .

INSTALLATION

Installation is unintrusive and simple due to the little amount of required building work, the need for only a small pit, and the extremely low headroom requirements. In order to ensure that you can go about your normal business, we aim to complete the installation quickly and with the least possible disruption to your property or the neighbourhood.

NATIONWIDE INSTALLATIONS

We have been installing home lifts of the highest quality to residential properties across the UK for decades. We take a personal approach to each project and ensure that all your requirements and ideas are reflected in the finished project with a swift and hassle free installation. Always following the UK's strictest quality and safety standards.

SERVICING & WARRANTY

Acute Elevators always include a full comprehensive 12 months warranty with every new lift installation, comprising of cover for all of the parts and 2 service visits annually as standard.

BOOK A CONSULTATION

Contact Acute today, we will evaluate your needs and desires, discuss the available options and start designing the perfect lift package solution.

CABIN WALLS,DOORS & CONTROL PANEL FINISHES

POWDER COATING

The environmental choice, due to the fact that almost no pollutants are emitted into the air. Available on practically every available surface of the lift, we offer electric powder coating when a more specialised finish is required. Our powder coated surfaces are particularly durable since they can be more resistant to chipping, scratching, fading, and wearing than other finishes.

CABIN WALLS, DOORS & CONTROL PANEL FINISHES

STAINLESS STEEL

For our cabins and doors, we only use stainless steel of the greatest quality. Stainless steel is a resilient and sanitary material. Satin, textured, and super mirror surfaces guarantee a classic, high-quality finish.

A close-up photograph of a person's hand, wearing a light blue long-sleeved shirt, reaching towards a control panel. The panel features several circular buttons: a top row with buttons labeled '3' and '4'; a second row with a green button labeled '1' and a silver button labeled '2'; a third row with three buttons containing left and right arrow symbols and a '0' symbol; and a bottom row with a button containing an upward arrow symbol and a glowing blue button with a four-leaf clover-like symbol. The word 'CONTROLS' is overlaid in white, bold, sans-serif capital letters across the center of the image, partially overlapping the hand and the control panel.

CONTROLS

CABIN CONTROLS

We have a variety of control panels specifically designed for our cabins, but we can also provide an integrated solution that uses the cabin wall, a surface that may be finished in virtually every material we provide.

TRACTION DRIVE SPECIFICATION

Normative	Machinery Directive 2006/42/UKCA EN-81/41
Certification Body	Bureau Veritas
Power supply	230 v single phase (+/- 5%) 50 to 60 Hz
Starts per hour	30
Duty cycle	33%
Load Capacity	300, 400 & 450kg
Accesses	Single, Through & Adjacent (inc triple entrances)
Travel (max)	25m
No of stops (max)	8
No of services (max)	8
Distance between floors (min)	400mm
Shaftway	Masonry, concrete or metal structure
Control panel	EP, e-prom motherboard.
Emergency manoeuvre	In case of power failure the cabin will rise or descend to the most convenient floor. Available uPS for bringing to defined floor as optional.
Traction	1:1 roped
Sling	Cantilever

HYDRAULIC DRIVE SPECIFICATION

Normative	Machine Directive 2006/42 UKCA
Power Supply	230 v single phase (+/- 5%) - tension 50 or 60 Hz, 400 V three phase.
Starts per hour	30
Duty cycle	33%
Rated load - ELFO XL	300, 400, 500, 750, 1000 & 1200 kg.
Access	Single, Through, Adjacent (inc triple entrance)
Speed	0.15 m/s
Max no of stops	8 (single entry)
Max no of services	8
Minimum travel	500mm
Maximum travel	15m
Shaftway	Masonry, concrete or metal structure
Control panel	EP, e-prom motherboard
Emergency run	in case of power failure, cabin returns to lowest floor and opens the doors.
Acting	Hydraulic 2:1 roped
Sling	Standard Cantilever
