# A DECADE THROUGH THE VINES

Once upon a vintage...  
France has always told stories through its wines — of weather, soil, decisions, and time.

To understand a wine is to understand the year it was born in.

Over the past ten years (2015–2025), the climate has shaped wine in new and surprising ways.  
Warmer summers, earlier harvests, smaller yields — but also finesse, clarity, and unexpected beauty.

In **Bordeaux**, 2015 and 2016 were classics: balanced and structured. 2018 and 2020 brought heat and power.

**Burgundy** saw precision in 2017, brilliance in 2019, and tiny but expressive volumes in 2021.

The **Loire** gave us purity and brightness, while **Alsace** produced aromatic wines with lift and elegance.

In **Champagne**, patience paid off: even challenging years yielded wines of freshness and energy.

The **Rhône Valley**, especially the southern part, saw concentration and spice from sun-soaked vintages like 2022 and 2023.

Even **Languedoc** and **Provence** showed remarkable finesse in the hands of thoughtful producers.

What you'll find in this list is not just a selection of wines it's a timeline.  
A tasting of ten seasons. A map made of glass.

Is more than a collection of bottles it's a collection of stories.

Explore with curiosity. Ask us anything.

We're proud of this selection — and we hope it speaks to you.

Enjoy the ride. Santé.
