 Made in Sweden

SUSTAINABLE

100% Recycled & Recyclable
Low Carbon Emissions
A truly circular product
Saves waste from incineration
No additives, low VOC

HIGH PERFORMING

Strong & Stable
Superior shear strength
High screw strength
Security Class 2

SIMPLE

No adaptation needed:
Same tools and fasteners
Same application and performance
Same handling and installation

COST EFFICIENT

An affordable way to radically
reduce emissions from your
construction project
Replace Plywood and save money

100%

 Recycled
Recyclable

CO2

Made of 100% recycled raw material completely without additives in an energy-efficient process. The result is -10.6 kg CO2e / m2 (GWP total A1-A3, fossil: 0.53 kg / CO2e)

Acoustic

Can always replace other boards with the result that the acoustics in the wall are improved. Superior to other boards on the market in terms of airborne sound insulation.

Fire

Performs equivalently or better in wall systems. Clad with a layer of gypsum to achieve EI60 / EI90

Proven & Verified

Has been tested for all properties in accredited laboratories (durability of at least 30 years), and has been successfully used on a large scale by Sweden's leading construction and real estate companies

100%

 Simple
Sustainable
Cost-effective
High-performing
