Design Customization

With a wide selection of playful surface shapes and a variety of height options, Pillar seamlessly blends into any space. Customization options provide the flexibility to create environments that are functional and visually engaging.

Built to Last

Engineered for movement and the demands of active learning environments, Pillar delivers lasting durability and reliable performance to support students and educators year after year.

Engineered for Flexibility

Built to support both individual work and collaborative learning, Pillar's flexible design and optional mobility features allow for adaptable configurations, helping classrooms evolve with changing teaching styles and activities.
