

UNBUBBLE – Chat Roulette for Democracy

Executive Summary

Democracy weakens when we stay in "bubbles". Polarisation divides, eroding trust. Avoiding disagreement stifles civic growth. By fostering open, constructive dialogue, we enhance innovation, collaboration, and tolerance. Our platform connects individuals through shared curiosity, not demographics, encouraging meaningful debates and empowering citizens to become certified Constructive Debaters. Let's UNBUBBLE!

Problem

Democracy weakens if people stay in their own "bubbles" and avoid difficult conversations. It is still easier to avoid disagreement and open dialogue instead of engaging with those we disagree with.

Goal

We boost democracy by enabling your team's ability to have civilised, compassionate and constructive dialogue. This results in more motivated citizen, better decisions, dissolved silos, higher tolerance, and productive disagreement.

Solution

Let's UNBUBBLE – the Chat Roulette for democracy!

- You show up – authentically. Create a profile on our platform built based on your perspectives.
- We match you – intentionally. Not by demographics or looks, but by using an entry survey and disagreement comfort level filters.
- You talk – and something shifts. Facilitated, purpose-driven dialogue and debate that challenges your assumptions, sparks empathy, and unlocks curiosity.

Moderation will be facilitated using established debate guidance to ensure everyone feels safe and to keep the conversations on topic.

We are putting opinions into perspective, helping your business thrive.
