

Power Your Growth With Pre-Mix Precision

TOLLING WITH SENSAPURE SIMPLIFIES SUPPLY AND SUPERCHARGES OUTPUT

Simplify, Streamline, Succeed

With our pre-blended active ingredient kits and finished blend totes, our manufacturing partners can put more powder in more containers faster than ever.

Co-manufacturers today need to be efficient, flexible, and deliver top quality. Sensapure Flavors was built in manufacturing and understands your needs. With our tolling model, we provide the pre-mixes—so you can focus on manufacturing.

Toll manufacturing can **reduce operational costs by up to 20%**

- No Inventory Risk
- Lower Financial Exposure
- Enhanced Liquidity
- Simpler Ops
- Trusted Quality
- Steady Output

Manufacturing Mastery

Tolling allows co-mans to streamline operations, reducing procurement overhead by focusing solely on production.

Focus on production—Sensapure handles the pre-mix. Our tolling model simplifies your supply chain, reduces overhead, and keeps your lines running strong.

The Financial Edge of Tolling

RTM beverage manufacturers can increase profits with tolling reducing working capital needs by eliminating ingredient inventory costs.

Tolling with Sensapure Flavors removes the cost and hassle of managing raw ingredient inventory. Brands can send their own ingredients or use our global sourcing network.

We create custom functional blends or pre-mixes and deliver them to your facility—ready to run. This cuts credit risk, boosts cash flow, and frees up funds for equipment, staffing, or upgrades. Plus, our pre-mixes are built for consistency, keeping your lines running smoothly.

Build Sticky Partnerships

Toll manufacturing fosters long-term client relationships, with 65% of tolling contracts leading to multi-year partnerships.

Sensapure's tolling model helps you build long-term, reliable partnerships with top brands. These "sticky" relationships mean steady business, chances to upsell services, and a strong reputation in the growing functional beverage market.

Faster Production, Higher Capacity

Tolling cuts production time by up to 30% by removing sourcing delays.

Speed matters. Tolling with Sensapure removes sourcing delays so you can start production right away. Our ready-to-use blends speed up batch turnarounds, boost capacity, and help you stay competitive in the \$229B functional beverage market.

"A leading manufacturer reported a **20% improvement in cash flow** within the first year of transitioning to a toll manufacturing model."

-Conversion Technologies International

- **Faster Start Times**
- **More Output, Less Downtime**
- **On-Trend Formulas Like Probiotics and Adaptogens**

An increasing number of manufacturers are adopting toll models to mitigate risks and enhance operational resilience.

Start Small, Scale Big

New co-mans can enter the market with 40-50% lower startup costs by adopting tolling, avoiding supply chain investments.

For new or growing co-mans, tolling with Sensapure is a low-risk way to enter the market fast. Our pre-mixes let you start production right away—no big upfront costs. As you grow, we scale with you.

Low Entry Barrier:

Start production with minimal capital investment.

Scalable Growth:

Transition to larger contracts as capacity expands.

Partner with Sensapure:

Leverage our formulation expertise for success.

Reduce Risk, Ensure Compliance

Brands controlling ingredient sourcing often assume primary responsibility for regulatory compliance, reducing co-man liability.

Tolling with Sensapure takes the pressure off your team when it comes to compliance. Brands handle label claims, while our pre-mixes meet FDA and other standards. You stay focused on production with less risk and more peace of mind.

Lower Compliance Risk

- Brands manage label claims and regulatory adherence.

Certified Pre-Mixes

- Sensapure ensures compliance with industry standards.

Consumer Safety

- Deliver safe, high-quality products with confidence.

Partner with Sensapure Flavors Today

The functional beverage market is booming, and tolling is your ticket to higher profitability, lower risk, and stronger partnerships.
