

SioSystems

The Art of Silence

Delivering acoustic excellence through
internal glazed partitioning solutions.

Who We Are & What We Do

Creating Spaces Where Design and Acoustic Performance Work Together

SioSystems is a specialist in high-performance acoustic glazed partitioning, doors and meeting pods, helping to create exceptional commercial interiors where privacy, collaboration and design work seamlessly together.

We work alongside architects, interior designers, specifiers and contractors from initial concept through to installation and aftercare - combining specialist technical expertise, quality systems and skilled project delivery to bring design intent to life.

Our Solutions

Our flexible range of acoustic systems can be tailored to meet different requirements for sound privacy, aesthetics and space:

- Single-glazed acoustic partitions – elegant solutions for offices, meeting rooms and commercial interiors.
- Double-glazed acoustic partitions – enhanced sound control for spaces requiring greater levels of acoustic privacy.
- Pivoting doors – framed, double-glazed, frameless and timber options.
- Sliding doors – space-efficient framed, frameless and pocket configurations.
- Acoustic meeting pods – flexible spaces for collaboration, concentration and private conversations.

Why SioSystems?

- Specialist acoustic glazing expertise
- UK-manufactured systems
- Patented SioSeal® acoustic technology
- Independently laboratory-tested performance
- Flexible and customisable solutions
- Design, manufacture and installation from one specialist partner
- End-to-end support from concept to aftercare

We don't simply supply partitions. We help design the right acoustic solution and take responsibility for bringing it to life.

Supporting Architects, Designers & Specifiers

From Design Intent to Acoustic Reality

Great interior spaces begin with the right specification.

SioSystems works collaboratively with architects, interior designers and specifiers from the earliest stages of a project, helping to develop acoustic solutions that balance performance, aesthetics, compliance, budget and buildability.

By engaging early, our specialists can help identify potential challenges before they reach site, reduce specification risk and ensure the proposed system meets the requirements of both the design team and end user.

How We Can Support Your Design

- Product and system selection
- Acoustic performance guidance
- Bespoke design solutions
- Detailed technical drawings
- Interface and junction detailing
- Buildability advice
- Specification support
- Sustainability considerations
- RIBA-approved CPD learning

Project-specific detailed drawings that guarantee performance and compliance with the client brief within seven days.

Our detail-led approach helps ensure the design is right from the outset, providing greater confidence throughout specification, coordination and delivery.

Engage Us Early

Whether you're developing an initial concept, writing a specification or resolving a complex acoustic challenge, early collaboration with SioSystems can help create a better-performing solution and reduce risk later in the project.

Helping Contractors Deliver with Confidence

A Specialist Partner That Understands Construction

For contractors, choosing the right specialist subcontractor is about more than the quality of the finished product. It's about working with a responsive and reliable partner that understands construction programmes, coordinates effectively with other trades and takes responsibility for delivering its package properly.

SioSystems works closely with contractors and project teams to deliver safely, efficiently and in line with the wider construction programme.

How We Support Contractors

- Early design and technical coordination
- Detailed project-specific drawings
- Clear communication throughout the project
- Dedicated and experienced project management
- Coordination with site teams and other trades
- Programme-focused manufacture and installation
- Weekly progress reporting
- Self-snagging before handover
- Post-completion support and aftercare

Built Around Your Programme

We understand that successful project delivery depends on coordination, communication and reliability. Our team works proactively with contractors to anticipate challenges, coordinate interfaces and align our activities with the construction programme — helping to minimise disruption, reduce risk and achieve a quality finish.

From initial specification to final handover and aftercare, SioSystems provides the expertise, products and project support needed to deliver acoustic excellence with confidence.
