

UPP

Design, manufacture and installation of
internal acoustic glazed partitions with
pivot framed doors

Project Details

Client: UPP

Architect: Resonate

Contractor: Parkeray

Date: 2020

Project Overview

UPP is the UK's leader in on-campus accommodation, employing around 1,000 people. With an investment of over £3bn into the UK higher education sector, they have provided homes for more than 400,000 students. To reflect their workplace vision, UPP required a cutting-edge modern office that would drive communication and collaboration.

Our Solution

Working closely with architects Resonate and main contractor Parkeray, SioSystems designed, manufactured, and installed a tailored solution. Our Silence 25 and Silence 100D acoustically rated glazed partitions were used throughout the scheme to create flexible spaces that balance openness with privacy.

Outcome & Impact

The result is a workplace that promotes activity-based working and employee wellbeing, achieved through inventive and contemporary design. The new office not only supports collaboration but also provides the acoustic comfort needed for focused work, aligning perfectly with UPP's vision for a future-ready workplace.
