

VEGVISIR VIRTUAL COMMAND STATION

Revolutionizing Command & Control

VEGVISIR VIRTUAL COMMAND STATION redefines traditional command posts, turning them into mobile and interconnected environments. By replacing bulky setups with an intuitive, compact platform featuring unlimited virtual screens, it ensures real-time situational awareness and seamless control. Ideal for scenarios demanding rapid setup and efficient operation in confined spaces.

MAIN BENEFITS

- Centralize all assets in one digital system for streamlined operations
- Collaborate seamlessly in a shared virtual workspace
- Operate efficiently in confined spaces
- Scale without needing extra hardware
- Cut costs while improving situational awareness

KEY FEATURES

- Unlimited virtual screens with real-time data integration
- Quick relocation, adaptable for APCs, IFVs, or custom setups
- Integrates UAVs, ground sensors, and logistics data
- Scales to support any team size or mission
- Privacy mode to protect sensitive content
- Attention alerts for synchronized decision-making
