

# Transpacific subsea connectivity from Washington State to Asia- Pacific & Oceania Markets

with protected terrestrial  
backhaul network  
connectivity to Seattle, WA  
and Hillsboro, OR.

## ABOUT

Toptana Technologies is driven by a vision of a truly connected world. We're an indigenous-owned internet infrastructure and technology company focused on bringing connectivity to unserved and under-served communities. Our mission is to connect the digitally disconnected so that all people can fully participate in the digital economy.

We offer businesses the opportunity to get their traffic where it needs to go, while protecting our precious resources and improving the lives of those in need.

# Our Solutions

## CABLE LANDING STATION

Our cable landing station sits on the coast of Washington State and offers secure, reliable subsea connectivity from the Pacific Northwest United States to Asia-Pacific & Oceania markets. The robust fiber optic backhaul network offers dark fiber cross connects to major telecom peering points allowing your business to grow and expand into regional & global markets. Within the facility, we also offer colocation, cross-connect, and remote hand services for your edge data center needs.

4 Cable Systems

Open & Neutral Connectivity

Scalable, Modular Deployments

High Reliability, Availability, & Security

Customizable Solutions

## BACKHAUL NETWORK

Our terrestrial backhaul network connects from the cable landing station located in the Olympic Peninsula and runs along I-5 up to Seattle, WA and down to Hillsboro, OR.

## Why Toptana

**Global network connectivity & route diversity with greater speed to market**

Toptana Technologies is owned by the Quinault Indian Nation. Among the many competitive advantages, Toptana offers route diversity from Oregon & California with minimized risk for community disruption and a more streamlined speed to market.

**Highly reliable and secure with a trusted industry operator**

Our CLS & backhaul networks solutions are designed, built, and operated by Assured Communications Advisors – industry experts with decades of experience designing, building, owning, and operating critical infrastructure and assured communications in the most challenging environments.

**Get just what you need, when you need it – flexibility enabled by an agile partner and modular approach**

We understand that not all businesses are the same, and neither are your requirements. Our modular build approach gives you the flexibility to customize your deployments and scale over time.

**Maximize your positive socio-economic impact and minimize your environmental impact in the communities where you locate**

Toptana Technologies is dedicated to helping unserved and underserved communities bridge the gap of the digital divide. Doing business with Toptana directly impacts the Quinault Indian Nation's community and opens the door for many other rural communities to connect to the global economy. In addition, you can rest assured that your investment is limiting environmental impact, as the Quinault Indian Nation is deeply rooted in environmental stewardship.
