CodeHQ
SINCE 1993

Accelerate Smarter, More Resilient Supply Chains

CodeHQ helps logistics and supply chain organisations modernise legacy platforms, integrate complex business systems, automate manual processes and deliver better digital experiences for customers and teams. With more than 30 years' experience, we combine New Zealand governance with our wholly owned development centre in Vietnam to cost-effectively deliver secure, scalable solutions faster. CodeHQ is a Theta Group company, bringing additional expertise, scale, and broader experience across a wide range of customers in this and other complex, highly regulated industries.

> ***"CodeHQ quickly proved to be efficient, adaptable, and highly collaborative, working seamlessly with our internal teams to establish a common way of working."***

How We Help Accelerate Growth

Business Challenge	Custom Development and Integration Of:	Business Outcome
Legacy systems limiting innovation and scalability	Modern cloud-based customer portals, legacy system modernisation, enterprise platform integration, cloud migration, application redevelopment, scalable software architecture.	Improved customer experience, simplified operations, enabled future growth with improved ability to adopt new technologies, enabled AI-ready capabilities, reduced technical debt, lower maintenance costs.
Disconnected business systems, operational inefficiencies	Enterprise systems integration connecting ERP, warehouse management, transport management and inventory systems, customer portals and third-party systems, API/EDI/Cloud integrations, real-time data exchange between multiple business systems.	Real-time information sharing and seamless data flow across supply chain reduces manual effort, improves accuracy and creates faster and more efficient operations.
Repetitive manual processes slowing teams down	Workflow automation, order processing, warehouse workflows, document generation, notifications and business process automation.	Faster processing, fewer errors, reduced operating costs, improved productivity.
Customers' real-time visibility and added value	Customer branded/self-service portals, shipment tracking, order management, inventory visibility, returns management, reporting dashboards, customer-specific workflows.	Improved customer experience, reduced support enquiries, increased customer satisfaction, increased loyalty & retention, stronger competitive advantage.
Business mergers and acquisitions	Consolidated customer portals, unified integration platforms, digital transformation projects.	One consistent platform, simplified operations, reduced maintenance overhead.
Reporting and operational data	AI-ready reporting platforms, analytics dashboards, natural language data access (future capability).	Faster access to business insights, improved decision making.
IT maintenance costs during scale	Cloud migration, application modernisation, scalable software architecture.	Lower maintenance costs, easier upgrades, greater flexibility for future technology adoption.
Responsible AI adoption	AI-assisted software development supported by strong governance frameworks, code review processes, customer-specific AI policies.	Faster software delivery while maintaining quality, security and compliance with customer expectations.

Code HQ
SINCE 1993

> *"They don't just do as you ask — they consider what you've asked and offer guidance on how it can be done even better."*

Why CodeHQ

- 30+ years delivering enterprise software for highly regulated organisations.
- Trusted by leading logistics organisations
- Experience across nationwide and international logistics and supply chain operations.
- Proven capability in digital, data, integration, modernisation, emerging technologies.
- Governance-led delivery model with scalable engineering capacity across APAC.
- Access and scale up or down experienced software engineering and QA teams.

The Theta Group

- The Theta Group brings broader expertise, scale and customer base.
- Theta is ISO 27001 certified, a leading Microsoft Solutions Partner and an Anthropic Registered Partner.
