Scanning

Our scans provide you with the highest resolution color-accurate master files fit for maximum enlargement or high-end reproduction larger than the original.

Our Scanning services include a complimentary consultation to determine the best way to scan your artwork, and a light file clean-up and adjustment to match the original.

Scanning rates are based on the physical dimensions of each artwork. Neon colors, metallics, gloss, and special pigments can prove challenging to capture, which can be discussed during your consultation. If you have any questions or are unsure about whether your artwork can be scanned by us, please contact us directly with the specifications of your artwork.

All artwork must be removed from frames. All artwork must be dry. If completed with charcoal, graphite, or pastels, all artwork must be fixed.

Scanning turnaround is generally 1-3 business days, but expedited service can be arranged. Let us know of a critical deadline in advance.

Up to 50" x 60"	\$350 / scan
Up to 48" x 70"	\$375 / scan
Larger Sizes	Contact us

Orders \$1000+ are subject to a 3% credit card fee.

File Delivery

We will deliver hi-res 1200 PPI RGB scan files in .TIFF format, once they have been lightly cleaned and color matched to their originals. If a scan required the use of our scanner's 3D light, it will be delivered in 600 PPI.

Drum Scanning

For photographers looking for film scans that surpass in quality, drum scans are available through our partner [Drum Scanning NYC](#). Drum scanning provides the absolute best quality file from any film format, up to 8000 PPI in 16-bit grayscale or 48-bit color.

Visit Drum Scanning NYC at drumscanning.nyc/ to learn more about their services.

All of our Scanning services are subject to the payment and working terms in our Studio Policy, as well as our Limit of Liability.

To read these terms fully, please visit:
