

For sports venues

Real-time construction and portfolio control with PROBIS AI for sports venues.

Automated venue and asset control, built for CFO, IFRS, governance, and ownership standards, with AI-driven CAPEX, OPEX, procurement, and performance oversight across venues, campuses, and portfolios

For:

- Stadium owners and sports venue operators
- Football clubs and multi-asset organizations
- CFOs and sports finance leadership teams
- CREM, asset, and portfolio managers
- Sports facilities, infrastructure, and workplace teams

We address:

- Multi-source reporting across stadium and campus assets
- Siloed cost, procurement, and operations data
- Fragmented systems across projects, vendors, and regions
- Limited real-time CAPEX, OPEX, and commitment visibility
- Reactive steering across budgets, risks, and approvals

Our value for you:

- Real-time transparency across venues, assets, and portfolios
- Automated reporting aligned with finance and governance standards
- Early risk detection across CAPEX, OPEX, and commitments
- Benchmark-driven insights for financial decisions
- End-to-end control across asset and project lifecycles

Relevant Case Study

FC Bayern leveraged PROBIS across Allianz Arena and the FC Bayern Campus to strengthen financial governance in complex sports real estate. PROBIS connects AI-generated reporting, CAPEX planning, budget control, invoice verification, batch approvals, fund tracking, procurement workflows, and operating data within one platform.

The Allianz Arena, opened in 2005 after under three years of construction, combines seven levels and 75,024 seats for domestic matches. The FC Bayern Campus, operational since 2017, covers roughly 30 hectares with eight football fields for youth, women's, and girls' teams. PROBIS served and serves as the central financial control layer across these assets, enabling real-time risk detection, commitment tracking, project transparency, and portfolio-level governance.

By replacing fragmented Excel workflows, FC Bayern reduces administrative effort, accelerates approvals, strengthens audit-ready compliance, improves cost certainty, and mitigates budget overruns.
