

Amy Hiscock

Advanced Nurse Practitioner, Independent Nurse Prescriber

Breach of Duty Reports

Specialisms:

- Advanced clinical assessment and autonomous decision-making
- Primary care and urgent same-day presentations
- Palliative and end-of-life care
- Cancer care (colorectal, urology and metastatic disease)
- Skin lesion assessment and cancer referral pathways
- Long-term condition management (including COPD)
- Wound assessment and management
- Advanced care planning, DNACPR and RESPECT processes
- Multidisciplinary team leadership and service development

Profile:

I am an experienced Advanced Nurse Practitioner currently working within a busy GP practice across two sites, where I am a core member of the senior leadership team. I practise autonomously, assessing, diagnosing, and managing patients presenting with both routine and urgent same-day clinical needs.

I am an Independent Nurse Prescriber and have completed advanced health assessment training. I currently act as palliative care lead for two surgeries, chairing Gold Standards Framework (GSF) meetings and working closely with external multidisciplinary teams to coordinate high-quality, patient-centred care.

My clinical practice includes assessment and management of infections, wounds, cancer-related concerns and palliative needs, alongside the investigation of undifferentiated symptoms and suspected malignancy. I regularly assess skin lesions for suspected skin cancer and initiate referrals via appropriate pathways, including 2-week wait referrals, ensuring all relevant investigations are completed in line with best practice.

Previous Roles:

- Advanced Nurse Practitioner, North Staffordshire Combined Healthcare Trust (2023–Present)

Maggie Sargent & Associates
