- Non-medical Prescriber
- Orthopaedics
- Pain Management
- Personal Injury
- Spinal Injury
- Trauma
- Upper Limb

Profile:

I am a Registered Physiotherapist with 26 years post qualification experience within both hospital and community settings. I have specialized in Musculoskeletal conditions for the last 24 years and have worked as a Clinical specialist and Advanced practice (Extended scope) physiotherapist for the last 19 years.

I prepare Civil Procedure compliant expert witness Physiotherapy reports for the Court covering a wide variety of complex injuries. My knowledge, skills, and expertise enable me to practice as a Physiotherapy expert witness in personal injury and clinical negligence cases reporting on Quantum and Liability.

In addition to my Physiotherapist role, I worked as a clinical case manager for clients who have catastrophic life changing injuries for 5 years. The ethos of my practice is always to provide a high-quality Physiotherapy service to enable clients to optimise their function and improve their quality of life, whatever their condition or situation.

I am a member of the Meido-Legal Association of Chartered Physiotherapists (MLACP) and have received training in report writing, giving evidence, and other aspects of

Maggie Sargent & Associates

expert reporting. I assess and report on the physical needs of adults who have acquired impairment or disability and have musculoskeletal conditions. This includes all forms of common musculoskeletal conditions such as spinal and peripheral joint pain and soft tissue injuries.

The clients I assess and manage have a wide variety of conditions including but not limited to fractures, dislocations, over-use injuries, sports and exercise injuries, and multi-trauma injuries.

I am experienced in supporting patients in a hospital setting and completed core rotations in all aspects of Adult Physiotherapy care including Respiratory, Neurological and Orthopaedic, and Care of the Elderly before I specialised in Musculoskeletal care. I have worked with a variety of health and social care professionals and accumulated a good knowledge of the holistic care required to support clients.

I have held several posts managing clinical services and teams including both the set up and redesign of Physiotherapy and Musculoskeletal interface services. I have also, over many years, supervised and mentored junior Physiotherapy staff, junior doctors, students, and clinical support workers.

I understand my duties under the Civil Procedure Rules pertaining to expert witnesses and Part 35. I attend regular training updates and seminars to maintain my professional development.
