

# Who SciSure helps

Designed for the whole lab.

## For Scientists

- Focus on research, not admin.
- One space for protocols, notes, samples, collaboration, and results.

## For LabOps

- Track usage, automate stock alerts, simplify inventory.
- Manage equipment, maintenance, and lab-wide visibility.

## For EHS

- Stay audit-ready.
- Assign and manage training, incidents, and inspections.

## For IT

- Flexible hosting options.
- Custom integration capabilities with API and SDK.
- Role-based permissions.

## For Leadership

- Lab-wide visibility.
- Better decisions with real-time data.

SciSure aligns every team,  
so labs run smarter.

# SciSure

## The true Scientific Management Platform

Unifying ELN, LIMS, Health & Safety (EHS),  
and Integrations — so science moves  
faster, safer, and smarter.

# Why SciSure

Your home base for connected and reproducible science.

SciSure is the true Scientific Management Platform (SMP) built to eliminate silos and unify science, operations, and safety & compliance in one connected ecosystem.

Real-time  
collaboration

Centralized data  
+ workflows

Safer, more  
reproducible science

Built for scale  
and flexibility

Trusted by 550,000+ Scientists, EHS, and LabOps  
worldwide in 40,000+ laboratories

## Hosting & Support

### Hosting options

Choose how and where you deploy SciSure.

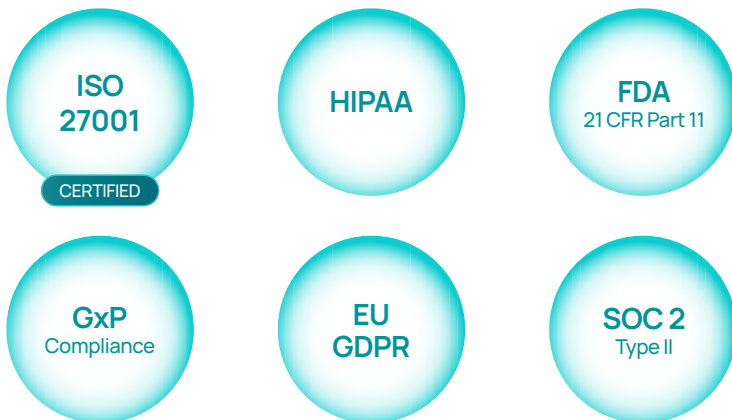

- Cloud (EU/US/Canada)
- Private Cloud - Required for Health & Safety capabilities.
- On-Premises - Fully deployed in your own environment.

### Onboarding & Support

Our team guides you from day one with hands-on training, live support, and best practices tailored to your workflows.

## Data Security & Compliance

Secure, compliant, and built for trust

# The Scientific Management Platform (SMP) overview

One platform. Four core capabilities.

### ELN

- Digital notebook
- Drag-and-drop experiment templates
- Real-time collaboration
- Version control + digital signatures
- Link samples, inventory, protocols, and more

### LIMS

- Sample tracking with audit trails
- Equipment logs and maintenance schedules
- Barcode integration for streamlined workflows
- Full inventory management

### Health & Safety (EHS)

- Chemical inventory, hazard tracking, compliance
- Incident reporting + risk assessments
- Training management and certifications
- Safety inspections and audit logs
- ✓ Supports ISO, OSHA, EPA, AAALAC, and other standards
- ✓ Permission-based access and audit-ready exports

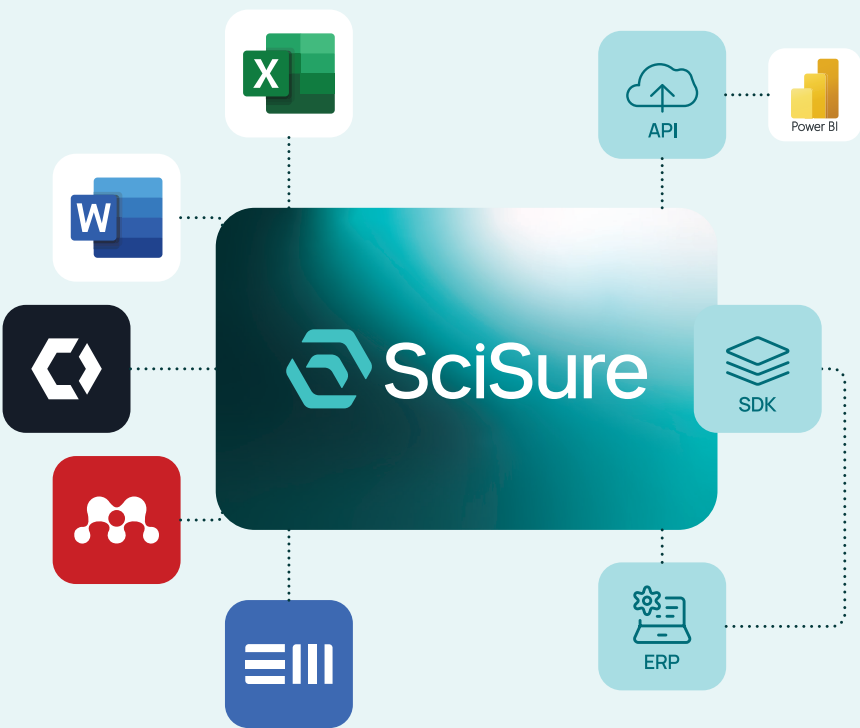

### Integrations & Data Connectivity

- 40+ plug-and-play add-ons
- Constantly growing library
- API + SDK availability for custom integrations

## Make SciSure your own

Customize your platform with ready-to-use Marketplace add-ons or build your own solutions with our Developer Hub.

SciSure grows with your lab—your way.
