Year 3 Autumn 2: What was the Maya Civilisation?

Please complete red home learning on Seesaw every week in time for Friday morning.

This term we have only provided 1 additional activity. This is linked to our science topic of Sound and will form part of an investigation into how instruments make sound.

Maths

Log onto Times Table Rock Star and get those times tables rocking out!
Your login for TTRS can be found in your yellow reading record. Your child will be focusing on a specific times table each week in preparation for their weekly test, which takes place every Monday. Please support your child by practicing this times table at home at least three times a week. You can find ideas and resources for practicing times tables on Seesaw.

Spellings

Children will receive a list of 6 to 8 spellings to learn over a three-week block. Each week, they will use a different technique to help reinforce and consolidate their understanding of the spellings. A paper copy of the spellings will be sent home every Friday, and they will also be available on Seesaw. **There will be a spelling test every Friday.**

Reading

Your child will bring home a book that is suited to their reading level. Please take time to read with them regularly, discussing the story and asking questions to support their understanding. Don't forget to record their reading in their reading record weekly. Once they have finished the book, they will take a quiz on it at school before selecting a new book. We also encourage you to help your child develop a love of reading by exploring other books at home as often as possible.

Year 3 Autumn 2

Task: Can children make a musical instrument at home and bring it into school to help support their learning of sound in their science lessons.

It could be a shaker type instrument or an instrument that uses strings (elastic bands).
