Badger Meter | BEACON® Software as a Service (SaaS) Gas
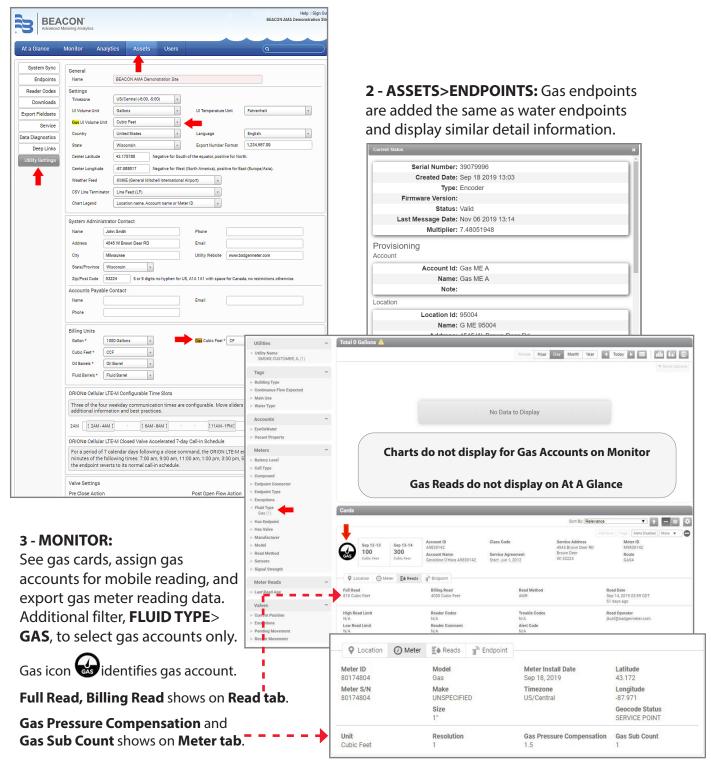

## HOW GAS WORKS IN BEACON

1 - ASSETS>UTILITY SETTINGS: Set the **GAS VOLUME** and **BILLING UNITS**

2 - ASSETS>ENDPOINTS: Gas endpoints are added the same as water endpoints and display similar detail information.

Charts do not display for Gas Accounts on Monitor

Gas Reads do not display on At A Glance

3 - MONITOR:

See gas cards, assign gas accounts for mobile reading, and export gas meter reading data. Additional filter, **FLUID TYPE**> **GAS**, to select gas accounts only.

Gas icon identifies gas account.

Full Read, Billing Read shows on **Read tab**.

Gas Pressure Compensation and **Gas Sub Count** shows on **Meter tab**.

Quick Reference

HOW GAS WORKS IN ORION MOBILE READ

Gas and **Water** accounts can be included in the same ROUTE or CYCLE to create Field Assignments in BEACON, and will be read at the same time.

OMR map displays both **Gas account icons** and **Water account icons** along the route and provides details for each account shown.
