

BUILD ENTERPRISE AUTOMATIONS IN MINUTES, NOT MONTHS.

Your team knows which service requests should be automated — access provisioning, group management, onboarding workflows, password resets. But every automation requires dev resources, weeks of configuration, and a queue behind bigger projects. The backlog grows. The tickets keep coming.

REZOLVE CREATOR STUDIO

Resolve Creator Studio is the AI-powered automation platform inside Resolve.ai. Describe what you need in plain English. The AI handles everything behind it — the connections, the logic, the error handling — and delivers a production-ready workflow, deployed and running, without a dev ticket or a line of code.

THE SHIFT

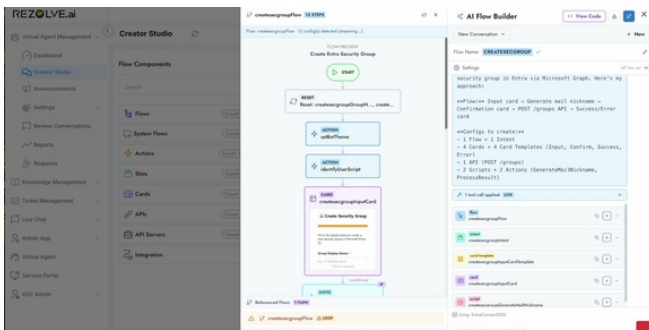

BEFORE

- Weeks to build one automation
- Requires integration developers
- Manual wiring, scripting, and testing
- Months from request to production

WITH REZOLVE CREATOR STUDIO

- Minutes — AI generates all configs autonomously
- IT ops teams build it in plain English
- AI handles connections, logic, and error states
- Same-day: describe, deploy, done

PROVEN AT SCALE

FORTUNE 50 CONSUMER GOODS COMPANY

A global consumer goods leader with 120,000+ employees across 81 countries and 23 languages deployed Resolve.ai as its default IT and HR support platform — replacing manual processes with agentic AI that resolves routine requests autonomously, delivers instant multilingual support, and connects seamlessly with Teams, Entra, HRIS, and other enterprise systems.
