

EVOLUTION OF BASS

The new MXi-118 infra-bass modules integrate effortlessly into existing MX-30 and MX-40 systems, delivering greater low-frequency power and extending performance deeper than ever before, reaching true infrasonic levels for a cinematic impact you can hear and feel.

As well as integrating into our modular systems, the MXi-118 can be added independently throughout your room, including the rear wall, to enhance coverage and consistency.

Dual-terminal, reversible cabinets provide added flexibility, allowing orientation to suit any room layout.

For the ultimate cinema experience at home, play it through Krix.

MXi-118 subwoofer

Infra-bass performance

Reproduces extremely low frequency sounds to create a tactile audio experience that you can feel.

Reversible sub design

Dual terminals allow the subwoofer cabinets to be oriented up or down, ensuring flexibility for any room layout.

Modular compatibility

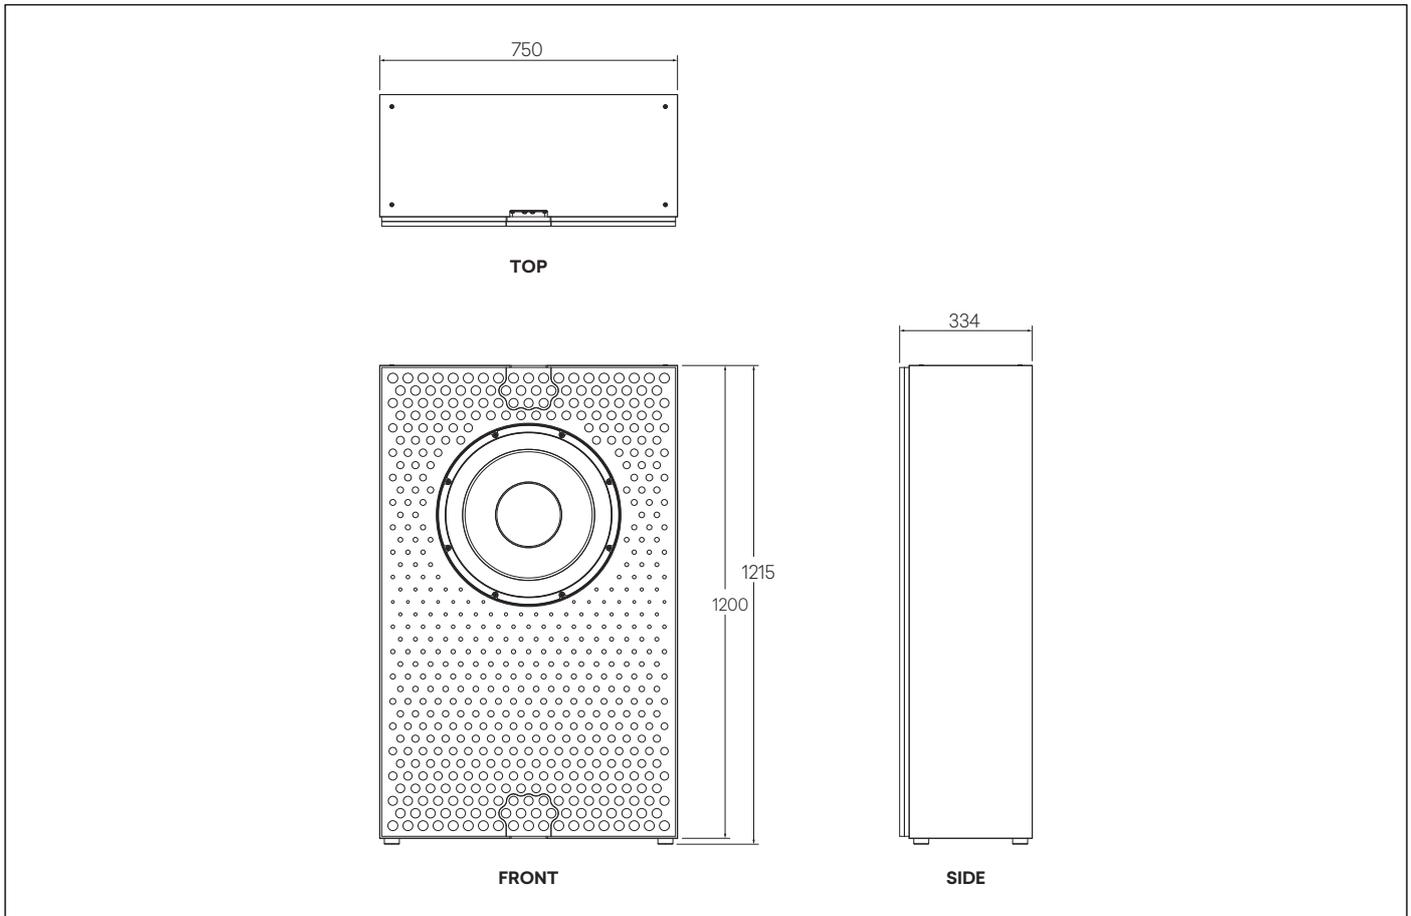

Purpose-built with the same height and slim-line depth as the MX-30 and MX-40 LCR modules.

Australian made

Krix has proudly engineered and manufactured speakers in Australia since 1974.

DIMENSIONS

MXi-118

MXi-118

Frequency range	10 Hz - 200 Hz (with DSP) 15 Hz -3 dB, 13 Hz -6 dB (with DSP)
Power handling	1500 - 3000 Watts RMS rec amp power
Rec processing	Approved amplifier with DSP required, consult with a Krix Certified System Designer
Sensitivity	100 dB (80 Hz - 2.83V @ 1m half space)
Impedance	4 Ohms
Configuration	Sealed
Low frequency driver	Single 460mm (18") treated paper cone driver. 100mm (4") voice coil, neodymium magnet and demodulating ring for low distortion. 50mm peak to peak displacement
Weight	55 kg each
Dimensions	1220mm high x 750mm wide x 335mm deep
