

DEEP BASS. FLEXIBLE PLACEMENT.

The Seismix 3D Mk3 brings deep, immersive bass into your system while offering flexibility in placement. Perfect for living spaces, media rooms and custom installations, it delivers performance without compromise.

Powered by a 275mm long-throw woofer and a high-efficiency Class D amplifier module, it produces deep, controlled bass with ease.

The down-firing design allows placement close to walls, in corners or within joinery, offering flexibility while filling your space with bass.

For the ultimate sound experience at home, play it through Krix.

Seismix 3 Mk8 in Black Woodgrain

Even bass impact

Delivers smooth, powerful, room-filling bass with clarity and control.

Precision performance

Effortlessly produces seriously deep bass for both music and movies.

Flexible placement

Ideal for corners, cabinetry and multi-purpose entertainment spaces.
