Never go over budget again.

Design budgets for your business

Set up budgets by department, team, or project, then add or remove people as necessary.

Track spend in real-time

Anytime. Anywhere. View up-to-date spend against budgets, so you always know where your business stands.

Pre-approved spending for teams

By setting limits on what employees can spend, approvals are built right into your budgets.

Control budgets by team

Assign permissions so leaders and managers control their own budgets.

Send funds from mobile or desktop

Budget owners or admins can approve or deny requests from a push notification to their phone (or online).

Review and forecast by period

Review spend in previous months and adjust budgets for upcoming months with budget periods.

"Now that we know how much we're giving each employee to spend we're able to forecast budgets months in advance."
