As of March 31, 2025

The Wilshire 5000 Total Market Index<sup>SM</sup> (Wilshire 5000<sup>SM</sup>) measures the performance of all U.S. equity securities with readily available price data. Approximately 5,000 capitalization-weighted security returns are used to adjust the index. The Wilshire 5000 base is its December 31, 1980 capitalization of \$1,404.596 billion. Therefore, the index is an excellent approximation of dollar changes in the U.S. equity market. For instance, values of 2157.146 on December 30, 1985 and 2164.690 on December 31, 1985 represent an approximate increase of \$7.5 billion. Created in 1974, with a time series of data beginning on December 31, 1970, the Wilshire 5000 is the most pure and complete measure of the entire U.S. stock market.
