FT Wilshire US Small NxtGen Index Series

September 30, 2025

The FT Wilshire NxtGen Indexes apply robust machine learning techniques to maximize risk adjusted return within a mean-tracking error optimization framework.

Inputs include over 100 market and fundamental signals selected from well-established academic research. Constraints are applied to limit stock concentration and industry exposure relative to FT Wilshire US Small Cap Index.

The FT Wilshire® indexes are calculated and distributed by Wilshire OpCo UK Limited (Wilshire Indexes). It is not possible to invest directly in an index. Exposure to an asset class represented by an index may be available through investable instruments derived from that index. Wilshire Indexes makes no representations regarding the advisability of investing in investment products based on the indexes not sponsored, endorsed, sold or promoted by Wilshire Indexes. Index returns do not reflect payment of certain sales charges or fees an investor may pay to purchase the securities underlying the index or investment vehicles intended to track the performance of the index. The imposition of these fees and charges would cause actual performance of the securities/vehicles to be lower than the index performance shown. Inclusion of a company in the Wilshire indexes does not in any way reflect an opinion of Wilshire Indexes on the investment merits of the company.
