Note 1: dimension measured at a closed side plate
- measured from the edge of the door

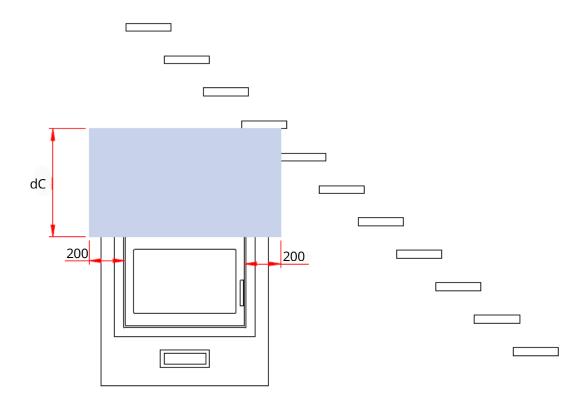

Be aware that the **dS** clearances in front of the insert must still be respected.

Note 3: measured from the front edge of the door when **dS** < 400 mm

Note 4: measured from the top edge of the wall grates Heat shields: on all three sides, positioned from the bottom of the stove up to 150 mm above the top of the stove

Safety distance to staircase/combustible ceiling

If combustible staircases or a combustible ceiling are located above the fireplace insert – measured from the top edge of the door to the nearest combustible part of the staircase: **dC** min. 600 mm
