*Handles included

■ Standard Features

- 12" touch screen with multi-language interface
- Built-in data logger with graphical user interface
- Single servo with digital current limiting
- Encoder and tach motion control
- Telemetry monitoring with fault detection and event trigger
- Calibration management system
- Automatic schedule generator (preset welding parameters, based on standard tube applications)
- Built in water cooler with flow sensor
- Digital gas flow meter
- Complies with high purity specifications
- USB and Ethernet connectivity

■ Specifications

- Length: 24.9" [632mm] x Width: 13.2" [335mm] x Height: 16.8" [427mm]*
- Weight: 55lbs [25kg]
- Input Power: 85-260 VAC; Single Phase, 50/60 Hz
- Current Output Range: 5 to 200A

■ Options

- Mass Flow Controller
- On board thermal printer
