

METROSIP

SIP TRUNKING ENGINEERED FOR RELIABILITY AND CONTROL

OVERVIEW

MetroSIP is our full-featured SIP trunking service, built for businesses that want enterprise-grade voice without giving up control.

Every trunk runs on Volli's secure, carrier-grade network with dedicated infrastructure tailored to your call volume and routing needs.

Ideal for contact centers, multi-location businesses, and any organization that depends on always-on voice connectivity. With a real-time management portal, geo-redundant routing, and E911 on every number,
