ATTRAKT® H_2O

BINA COMPANY®

IP65 Outdoor Lighting System

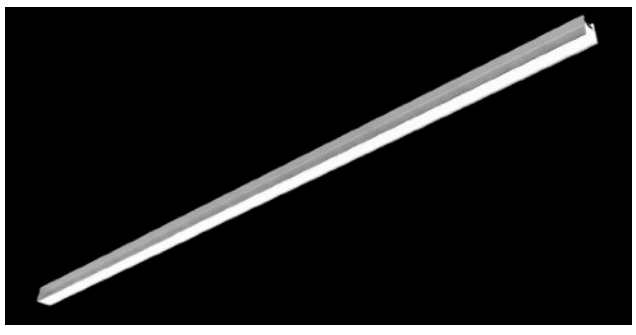

H_2O is an innovative 48V exterior (IP65) track lighting system that can be installed in humid and wet environments.

- The track itself can function as an independent diffused linear lighting system or as a base to provide power for a variety of plug-in luminaires.
- The diffused linear base is 198 lm/ft with a max fixture load of 43W/ft.
- The luminaires can be positioned anywhere along the track and can be moved several times without compromising the integrity of the IP65 rating.
- The profile is made of black anodized aluminum with painted side covers and end caps.
- Can be suspended, recessed or surface mounted

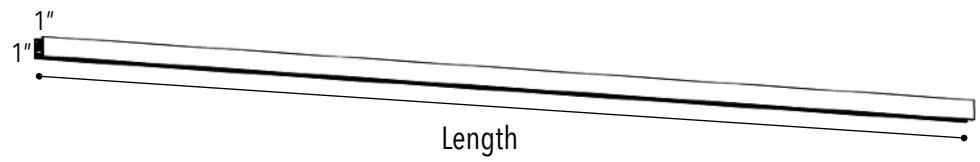

How to Specify

1. Specify the diffused track base
2. Specify the luminaires
3. Select the corner connectors based on the mounting and shape
4. Calculate the total wattage (track base + fixtures). Quantity and size of drivers will be determined by the factory.

IP65 Diffused Linear Track Base

Power: 3W/F / 66LM/W / 198LM/F (Delivered lumens based on 3000K)
Class III
