The investment objective of the underlying Fund is to provide investors with a professionally managed means of participating in Shari'a compliant investments across a range of global asset classes. The primary investment objective of the Fund is to achieve medium to long term capital growth while minimising risk through diversification across asset classes. The Fund will seek over time to acquire a diversified portfolio of collective investment schemes and direct investments including but not limited to investments in Murabaha, Sukuk, real estate and equity.

Monthly Commentary

The Fund was down 0.43% in November and is up 12.85% net of fees YTD. The Fund is outperforming the Morningstar USD Moderate peer group which is a conventional peer group) by 1.04% so far this year.

The Fund benefited from its equity allocation which outperformed the equity index during a volatile month of equity performance. In addition, the overweight gold allocation of 4.0% (absolute weighting of 9.0% to Gold) was a positive contributor to relative performance as gold prices rallied from some weakness in the prior month.

The S&P Global BMI Shariah Index was down 0.8% in November as market concerns about AI and slower than expected interest rate cuts by the FED impacted risk assets.

Treasury yields fell during the month by 6bps for the US 10 Year Treasury Yield on the back of weakening consumer sentiment readings.

The Fund is currently neutral equities, underweight fixed income by 3% and overweight gold and cash by 4% and 4% respectively.

The Fund is diversified across asset classes, countries and sectors. We continue to believe that high quality, well-diversified portfolios are the best ways to maintain market performance without taking significant market risk allowing us to absorb market turbulence and participate when risk markets move higher.
