

## Requirements

Reduce dunnage and void fill

Ship less air for accurate dimensions and transportation costs

Double packout throughput to support growth

Curtail labor challenges

Reduce carbon footprint

Optimize use of warehouse space

## Background

For over 50 years, Metro Supply Chain has been helping some of the world's fastest-growing and most recognizable organizations adapt and grow through innovative, real-world supply chain solutions that achieve exceptional results.

In their pursuit of operational excellence, Metro Supply Chain needed to increase their order processing capacity within their existing space and workforce. The organization was also committed to help Canada achieve its goal of net-zero emissions by 2050 while continuing to serve customers and communities effectively and responsibly. In their search of a way to address these multifaceted challenges, automating their packaging process proved beneficial.

## Solution

Metro Supply Chain chose to implement the CVP Impack automated packaging machine from Packsize, an innovative system that measures, constructs, tapes, weighs and labels each order in a custom-fit package.

Moving from manual packers to the CVP Impack significantly boosted the organization's throughput, delivering up to a 2.5 times increase in productivity. The automation was easy for anyone on the team to operate, and the auto-boxing solution provided the flexibility and adaptability required to efficiently manage spikes in order volume during Metro Supply Chain's busy periods.

In addition to saving time and money and boosting operational efficiency, the CVP contributed to Metro Supply Chain's sustainability goals. By leveraging fewer materials for packaging, enabling more efficient truck loading, and using recyclable corrugate, the CVP Impack reduced the organization's carbon footprint.

## Benefits

**Up to 2.5X increase in productivity**

**12% linear feet savings per order**

**User-friendly and seamless troubleshooting**

**Right-size packages for transportation cost savings**
