## 6-Person Office Capsule

Measuring just 2.7m x 3.2m internally, it combines curved, organic wall finishes with a printed surface aesthetic and double glazed window slits for comfort and efficiency. The entire pod is fully reusable, able to be disassembled, transported, and reassembled anywhere.

## Assembly Process

Built in just 2 days, entirely clean, pre-fab, and modular, with none of the mess or dust of conventional construction. High-tech foam wall finishes, the same material trusted in aviation for acoustic and thermal insulation, delivering exceptional sound dampening and climate control. The snap-on wall finishes are fully changeable, and wiring tucks neatly within the wall system cavities for a seamless, flexible setup. It's proof that speed, cleanliness, and sophisticated engineering can come together in one build.
