Core Satellite Strategy

The decentralised Web3 is based on blockchain and adjacent technologies. We anticipate that these technologies will disrupt the global economy and our society in the same way as the rise in e-commerce and social media and offer early investors outstanding return opportunities.

The Web3 Megatrends Certificate offers investors broad exposure to digital assets and builds on DCAP's core digital asset strategy enriched by the most promising megatrends identified and selected by the DCAP research and investment team. The current focus is on core Web3 infrastructure projects, including Layer1 and Layer 2 solutions, alongside major Web3 trends such as real world assets (RWA), decentralised finance (DeFi), physical infrastructure networks (DePIN), or artificial intelligence.

Additionally, the strategy uses a relative momentum approach to select and trade cryptocurrencies, focusing on assets that show stronger price performance compared to others over specific time periods.
