Title:

Lima Remote TV Codes

IR Code List

Subtitle:

Universal Infrared Codes for
Lima Remote Programming

Table of Contents

1. INTRODUCTION.....2

2. MANUAL CODE SETUP.....3

3. IR CODES TABLE.....4

1. Introduction

This document provides a comprehensive list of 3-digit infrared (IR) codes supported by the Amino Lima remote control for TV programming. Unlike other remotes that accept 4-digit codes, Lima only recognizes three-digit entries.

It compiles the entire Lima IR code library into an easy-to-use table for manual code entries.

2. Manual Code Setup

Each code consists of 3 digits. It may be programmed as follows:

1. Press and hold the Source (key #1) and Power (key #2) simultaneously for at least 3 seconds.
2. The remote control confirms the Setup activation by turning on the LED.
3. Enter the 3 digits code assigned to the target TV model, by pressing and releasing the corresponding digit keys.

Note, the LED reverse blinks once for every digit key press, except for the last one.

- If the code input is valid, the new code is programmed, and the LED performs a Success Blink.
- If the code input is invalid (i.e. is not available in the Universal Code Library), the new code is rejected and the RCU maintains the previously programmed code (if it's already programmed).

3. IR Codes Table
