**q. Trade payable**

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payables are classified as current liabilities if payment is due within one year or less after the reporting date. If not, they are presented as non-current liabilities.

**r. Borrowings**

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortised cost. any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawdown. In this case, the fee is deferred until the drawdown occurs. To the extent that there is no evidence that it is probable that some or all of the facility will be drawdown, the fee is capitalised as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

**s. Operating segment**

Entities disclose information that enable users of the financial statements to evaluate the nature and financial effects of the business activities. Operating segment is reported in a manner consistent with the internal reporting provided to the chief operating decision-maker.

**t. Earnings per Share**

Basic earnings per share are calculated by dividing profit or loss attributable to ordinary equity holders of the parent entity by the weighted average number of ordinary shares outstanding during the period.

Diluted earnings per share are calculated by dividing profit or loss attributable to ordinary equity holders of the parent entity, by the weighted average number of shares outstanding, for the effects of all dilutive potential ordinary shares.

**3. PERTIMBANGAN, ESTIMASI DAN ASUMSI AKUNTANSI SIGNIFIKAN**

Penyusunan laporan keuangan konsolidasian Grup mengharuskan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah yang dilaporkan dari pendapatan, beban, aset dan liabilitas, dan pengungkapan atas liabilitas kontinjensi, pada akhir periode pelaporan. Ketidakpastian mengenai asumsi dan estimasi tersebut dapat mengakibatkan penyesuaian material terhadap jumlah tercatat aset dan liabilitas dalam periode pelaporan berikutnya

Dalam proses penerapan kebijakan akuntansi Grup, manajemen telah membuat pertimbangan berikut, selain yang telah tercakup dalam estimasi, yang memiliki dampak signifikan atas jumlah-jumlah yang diakui dalam laporan keuangan konsolidasian:

**Penentuan Mata Uang Fungsional**

Mata uang fungsional dari masing-masing entitas dalam Grup adalah mata uang dari lingkungan ekonomi utama di mana entitas tersebut beroperasi. The determination of functional currency may require judgment due to various complexity, among others, the entity may transact in more than one currency in its daily business activities.*

Klasifikasi Aset dan Liabilitas Keuangan

Perusahaan menetapkan klasifikasi atas aset dan liabilitas tertentu sebagai aset dan liabilitas keuangan dengan mempertimbangkan apakah definisi yang ditetapkan dalam PSAK No. 109 telah terpenuhi. Aset dan liabilitas keuangan diakui dan dikelompokkan sesuai dengan kebijakan akuntansi.

Mengevaluasi perjanjian sewa

Perusahaan menentukan jangka waktu sewa sebagai jangka waktu sewa yang tidak dapat dibatalkan, bersama dengan jangka waktu yang dicakup oleh opsi untuk memperpanjang sewa jika secara wajar dipastikan akan dilaksanakan, atau periode apa pun yang dicakup oleh opsi untuk menghentikan sewa, jika sudah dipastikan secara wajar tidak akan dilakukan perpanjangan.

Penentuan apakah suatu perjanjian mengandung unsur sewa membutuhkan pertimbangan yang cermat untuk menilai apakah perjanjian tersebut memberikan hak untuk mendapatkan secara substansial seluruh manfaat ekonomi dari penggunaan aset identifikasian dan hak untuk mengarahkan penggunaan aset identifikasian, bahkan jika hak tersebut tidak dijabarkan secara eksplisit di perjanjian. Dalam menentukan jangka waktu sewa, Perusahaan mempertimbangkan semua fakta dan keadaan yang menimbulkan insentif ekonomi untuk menggunakan opsi perpanjangan, atau tidak menggunakan opsi penghentian. Opsi perpanjangan (atau periode setelah opsi penghentian kontrak kerja) hanya termasuk dalam jangka waktu sewa jika cukup pasti akan diperpanjang (atau tidak dihentikan).

Karena Perusahaan tidak dapat langsung menentukan suku bunga implisit, manajemen menggunakan suku bunga pinjaman inkremental Perusahaan sebagai tingkat diskonto. Ada beberapa faktor yang perlu dipertimbangkan dalam menentukan suku bunga pinjaman inkremental, yang banyak di antaranya memerlukan pertimbangan untuk dapat secara andal mengukur penyesuaian yang diperlukan untuk mencapai tingkat diskonto akhir. Dalam menentukan suku bunga pinjaman inkremental, Perusahaan mempertimbangkan faktor-faktor utama berikut: risiko kredit korporat Perusahaan, jangka waktu sewa, jangka waktu pembayaran sewa, lingkungan ekonomi, waktu di mana sewa dimulai, dan mata uang di mana pembayaran sewa ditentukan.

3. JUDGEMENTS, ESTIMATES AND SIGNIFICANT ASSUMPTIONS

Classification of Financial Assets and Financial Liabilities

The Group determines the classifications of certain assets and liabilities as financial assets and financial liabilities by judging if they meet the definition set forth in PSAK No. 109. The financial assets and financial liabilities are accounted for in accordance with the Group's accounting policies.

Evaluating lease agreements

The Group determines the lease term as the non- cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

Determining whether an arrangement is or contains a lease requires careful judgement to assess whether the arrangement conveys a right to obtain substantially all the economic benefits from use of the asset throughout the period of use and right to direct the use of the asset, even if the right is not explicitly specified in the arrangement. In determining the lease term, the Group considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

Since the Group could not readily determine the implicit rate, management use the Group's incremental borrowing rate as a discount rate. There are a number factors to consider in determining an incremental borrowing rate, many of which need judgement in order to be able to reliably quantify any necessary adjustments to arrive at the final discount rates. In determining incremental borrowing rate, the Group considers the following main factors: the Group's corporate credit risk, the lease term, the lease payment term, the economic environment, the time at which the lease is entered into, and the currency in which the lease payments are denominated.

**Sumber Estimasi Ketidakpastian**

Asumsi utama terkait masa depan dan sumber utama estimasi ketidakpastian pada tanggal pelaporan yang memiliki risiko bagi penyesuaian yang material terhadap jumlah tercatat aset dan liabilitas dalam keuangan konsolidasian untuk tahun berikutnya, diungkapkan di bawah ini. Grup mendasarkan asumsi dan estimasi pada acuan yang tersedia pada saat laporan keuangan konsolidasian disusun. Situasi saat ini dan asumsi mengenai perkembangan di masa depan, dapat berubah akibat perubahan pasar atau situasi di luar kendali Grup. Perubahan tersebut dicerminkan dalam asumsi yang terkait pada saat terjadinya.

Penentuan nilai wajar dari aset keuangan dan liabilitas keuangan

Ketika nilai wajar dari aset keuangan dan liabilitas keuangan dicatat dalam laporan posisi keuangan konsolidasian tidak dapat diambil dari pasar yang aktif, maka nilai wajarnya ditentukan dengan menggunakan teknik penilaian termasuk model discounted cash flow. Masukan untuk model tersebut dapat diambil dari pasar yang dapat diobservasi, tetapi apabila hal ini tidak dimungkinkan, sebuah tingkat pertimbangan disyaratkan dalam menetapkan nilai wajar.

Pertimbangan tersebut mencakup penggunaan masukan seperti risiko likuiditas, risiko kredit dan volatilitas. Perubahan dalam asumsi mengenai faktor-faktor tersebut dapat mempengaruhi nilai wajar dari instrument keuangan yang dilaporkan.

Masa Manfaat Aset Tetap

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen mengestimasi masa manfaat ekonomis aset tetap antara 4 sampai dengan 20 tahun, suatu kisaran yang umumnya diperkirakan dalam industri sejenis. Perubahan dalam pola pemakaian dan tingkat perkembangan teknologi dapat mempengaruhi masa manfaat ekonomis serta nilai sisa aset dan karenanya biaya penyusutan masa depan memiliki kemungkinan untuk direvisi.

Jumlah tercatat aset tetap Grup pada tanggal laporan posisi keuangan konsolidasian diungkapkan di dalam Catatan 10 atas laporan keuangan konsolidasian.

Cadangan Kerugian Penurunan Nilai Piutang Usaha

Grup mengevaluasi akun tertentu jika terdapat informasi bahwa pelanggan yang bersangkutan tidak dapat memenuhi kewajiban keuangannya. Dalam hal tersebut, Grup mempertimbangkan, berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas pada, jangka waktu hubungan dengan pelanggan dan status kredit dari pelanggan berdasarkan catatan kredit dari pihak ketiga dan faktor pasar yang telah diketahui, untuk mencatat provisi spesifik atas jumlah piutang pelanggan guna mengurangi jumlah piutang yang diharapkan dapat diterima oleh Grup. Provisi spesifik ini dievaluasi kembali dan disesuaikan jika tambahan informasi yang diterima memengaruhi jumlah cadangan kerugian penurunan nilai piutang usaha. Penjelasan lebih lanjut diungkapkan dalam Catatan 5 atas laporan keuangan konsolidasian.

**3. JUDGEMENTS, ESTIMATES AND SIGNIFICANT ASSUMPTIONS  
(Continued)**

**Sources of Estimation Uncertainty**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next consolidated financial year are disclosed below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, may change due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions as they occur.

Determination of fair value of financial assets and financial liabilities

When the fair value of financial assets and financial liabilities recorded in the consolidated statement of financial position cannot be derived from active markets, their fair value is determined using valuation techniques including the discounted cash flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair value.

The judgment includes consideration of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Useful Lives of Fixed Assets

The costs of fixed assets are depreciated on a straight-line basis over the fixed asset's estimated economic useful lives. Management estimates the useful lives of these fixed assets to be within 4 to 20 years. These are common life expectancies applied in the industry. Changes in the expected level of usage and technological developments could impact the economic useful lives and the residual values of these assets, therefore, future depreciation charges could be revised.

The carrying amount of the Group's fixed assets at the consolidated statement of financial position date is disclosed in Note 10 to the consolidated financial statements.

Allowance for Impairment Losses of Trade Receivables

The Group evaluates specific accounts where it has information that certain customers are unable to meet their financial obligations. In those cases, the Group uses judgment, based on the best available facts and circumstances, including but not limited to, the length of its relationship with the customer and the customer's current credit status based on third party credit reports and known market factors, to record specific provisions for customers against amounts due to reduce its receivable amounts that the Group expects to collect. These specific provisions are re-evaluated and adjusted if additional information received affects the amounts of allowance for impairment losses of trade receivables. Further details are disclosed in Note 5 to the consolidated financial statements.

**3. PERTIMBANGAN, ESTIMASI DAN ASUMSI AKUNTANSI

**Sumber Estimasi Ketidakpastian (Lanjutan)**

Cadangan Penurunan Nilai Persediaan

Grup melakukan penilaian analisis umur persediaan pada setiap tanggal pelaporan konsolidasian dan membentuk penyisihan untuk persediaan usang dan persediaan yang memiliki perputaran yang lambat yang diidentifikasi tidak lagi sesuai untuk digunakan dalam produksi, dengan mempertimbangkan nilai realisasi neto dari persediaan barang jadi dan barang dalam proses berdasarkan pada harga jual dan kondisi pasar saat ini. Jumlah tercatat persediaan diungkapkan dalam Catatan 7 atas laporan keuangan konsolidasian.

Liabilitas Imbalan Pascakerja

Penentuan liabilitas imbalan kerja dan beban imbalan kerja karyawan Grup bergantung pada pemilihan asumsi yang digunakan oleh aktuaris independen dalam menghitung jumlah-jumlah tersebut. Asumsi tersebut termasuk antara lain, tingkat diskonto, tingkat kenaikan gaji tahunan, tingkat pengunduran diri karyawan tahunan, tingkat kecacatan, umur pensiun dan tingkat kematian.

Hasil aktual yang berbeda dengan jumlah yang diestimasi diperlakukan sesuai dengan kebijakan sebagaimana diatur dalam Catatan 2p atas laporan keuangan konsolidasian. Sementara manajemen Grup berpendapat bahwa asumsi yang digunakan adalah wajar dan sesuai, perbedaan signifikan dari hasil aktual atau perubahan signifikan dalam asumsi yang ditetapkan secara material dapat mempengaruhi perkiraan jumlah liabilitas imbalan kerja dan beban imbalan kerja karyawan. Jumlah tercatat liabilitas imbalan kerja karyawan Grup diungkapkan pada Catatan 23 atas laporan keuangan konsolidasian.

Perpajakan

Grup selaku wajib pajak menghitung liabilitas perpajakannya secara self assessment berdasarkan pada peraturan pajak yang berlaku. Perhitungan tersebut dianggap benar selama belum terdapat ketetapan dari Direktorat Jenderal Pajak atas jumlah pajak yang terutang atau ketika sampai dengan jangka waktu lima (5) tahun (masa daluwarsa pajak) tidak terdapat ketetapan pajak yang diterbitkan. Perbedaan jumlah pajak penghasilan yang terutang dapat disebabkan oleh beberapa hal seperti pemeriksaan pajak, penemuan bukti-bukti pajak baru dan perbedaan interpretasi antara manajemen dan pejabat kantor pajak terhadap peraturan pajak tertentu. Perbedaan hasil aktual dan jumlah tercatat tersebut dapat memengaruhi jumlah tagihan pajak, utang pajak, aset pajak tangguhan dan beban pajak.

(Continued)**

**Sources of Estimation Uncertainty (Continued)**

Allowance for Impairment Losses of Inventories

The Group reviews aging analysis at each consolidated reporting date, and makes allowance for obsolete and slow-moving inventory items identified that are no longer suitable for use in production. Management estimates the net realizable value of such finished goods and work-in-progress based primarily on the latest invoice prices and current market conditions. The carrying amount of the inventories is disclosed in Note 7 to the consolidated financial statements.

Employee Benefit Liabilities

The determination of the Group's employee benefits liabilities and employee benefits expense is dependent on its selection of certain assumptions used by independent actuary in calculating such amounts. Those assumptions include among others, discount rates, future annual salary increase, annual employee turn-over rate, disability rate, retirement age and mortality rate.

Actual results that differ from the Group's assumptions are treated in accordance with the policies as mentioned in Note 2p to the consolidated financial statements. While the Group believes that its assumptions are reasonable and appropriate, significant differences in the Group's actual experience or significant changes in the Group's assumptions may materially affect its employee benefits liability and employee benefits expense. The carrying amount of the Group's employee benefits liability is disclosed in Note 23 to the consolidated financial statements.

Taxation

The Group as a taxpayer calculate its tax obligation by self-assessment refers to current tax regulation. The calculation is considered correct to the extent there is no tax assessment letter from the Directorate General of Tax for the tax reported amount or within five years (maximum elapse tax period) there is no tax assessment letter issued. The difference in the income tax liabilities might arise from tax audit, new tax evidence and different interpretation on certain tax regulation between management and the tax officer. Any differences between actual result and the carrying amount could affect the amount of estimated claim for tax refund, taxes payable, deferred tax assets and income tax expenses.

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayarkan untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar pada tanggal pengukuran. Nilai wajar didapatkan dari kuotasi harga pasar, model arus kas diskonto dan model penentuan harga opsi yang sewajarnya.

Instrumen keuangan yang disajikan di dalam laporan posisi keuangan konsolidasian dicatat sebesar nilai wajar, atau sebaliknya, disajikan dalam jumlah tercatat apabila jumlah tersebut mendekati nilai wajarnya atau nilai wajarnya tidak dapat diukur secara andal. Metode-metode dan asumsi-asumsi di bawah ini digunakan untuk mengestimasi nilai wajar untuk masing-masing kelas instrumen keuangan:

- Instrumen keuangan dengan jumlah tercatat yang mendekati nilai wajarnya.

Nilai wajar untuk kas dan setara kas, piutang usaha, aset lancar lainnya, utang bank jangka pendek, utang usaha, beban akrual, liabilitas lancar lainnya dan liabilitas imbalan kerja jangka pendek mendekati nilai tercatatnya karena bersifat jangka pendek. Jumlah tercatat dari investasi jangka Panjang, liabilitas sewa, utang bank jangka Panjang, liabilitas derivative, surat utang jangka menengah dan obligasi dengan suku bunga mengambang mendekati nilai wajarnya karena selalu dinilai ulang secara berkala.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models as appropriate.

Financial instruments presented in the consolidated statement of financial position are carried at their fair values, otherwise, they are presented at carrying values as either these are reasonable approximation of fair values or their fair values cannot be reliably measured. The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

- Financial instruments with carrying amounts that approximate their fair values.

The fair values of cash and cash equivalents, trade receivables, other current assets, short-term bank borrowings, trade payables, accrued expenses, other current liabilities and short-term employee benefits liabilities approximate their carrying amounts due to their short-term nature. The carrying amounts of long-term investments, lease liabilities, long-term bank borrowings, derivative liabilities, medium-term notes payable and floating rate bonds approximate their fair values as they are regularly reassessed.

Aset dan liabilitas keuangan tidak lancar yang tidak memiliki kuotasi pasar yang dipublikasikan pada pasar aktif dan nilai wajar tidak dapat diukur secara andal (penyertaan saham) dicatat pada biaya perolehan.  
Hierarki nilai wajar dari instrumen keuangan yang diukur pada nilai wajar adalah sebagai berikut.

**39. FINANCIAL INSTRUMENT (Continued)**

- Financial instruments recorded at amounts other than fair value.  
Lease liabilities notes are reported at their present values, which approximate the cash amounts that would fully satisfy the obligations as at reporting date.  
Non-current financial assets and liabilities which do not have quoted prices in active market and whose fair value cannot be measured reliably (such as investment in equity securities) are recorded at cost.  
The fair value hierarchy of financial instruments measured at fair value is provided below.

**40. KEBIJAKAN DAN TUJUAN MANAJEMEN RISIKO KEUANGAN  
(Lanjutan)**

**Risiko mata uang asing**

Mata uang pelaporan Perusahaan dan Entitas Anak adalah Rupiah. Perusahaan dan Entitas Anak menghadapi risiko nilai tukar mata uang asing karena sebagian dari penjualannya dan biaya pembelian dan pengeluaran tertentu dalam mata uang asing (terutama USD) atau yang harganya dipengaruhi secara signifikan oleh patokan pergerakan harga dalam mata uang asing seperti dikutip dalam pasar internasional.

Perusahaan dan Entitas Anak tidak memiliki kebijakan formal lindung nilai untuk eksposur valuta asing. Namun, karena Perusahaan dan Entitas Anak melakukan penjualan dalam mata uang asing dan menimbulkan biaya/beban dalam mata uang asing yang sama, hal ini sesuai dengan hal-hal yang dibahas dalam paragraf sebelumnya, fluktuasi nilai tukar antara Rupiah Indonesia dan mata uang asing lainnya (terutama USD) memberikan beberapa tingkat lindung nilai alami untuk eksposur mata uang asing Perusahaan dan Entitas Anak.

Pada tanggal 30 September 2025 dan 31 Desember 2024 jika Rupiah melemah/menguat sebesar 1% terhadap mata uang asing, dengan semua variabel lain dianggap konstan, kas dan setara kas, piutang usaha dan utang usaha untuk periode dan tahun yang berakhir pada tanggal 30 September 2025 dan 31 Desember 2024 akan menjadi lebih tinggi/rendah, terutama sebagai akibat dari keuntungan/ kerugian selisih kurs atas penjabaran aset dan kewajiban moneter bersih dalam mata uang asing dengan rincian sebagai berikut:

**40. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES  
(Continued)**

**Foreign currency Risk**

The Company and Subsidiaries' reporting currency is the Indonesian Rupiah. The Company and Subsidiaries faces foreign exchange risk as a portion of its sales and the costs of certain purchases and expenses are either denominated in foreign currencies (mainly USD) or whose price is significantly influenced by their benchmark price movements in foreign currencies as quoted in the international markets.

The Company and Subsidiaries does not have any formal hedging policy for foreign exchange exposure. However, since Company and Subsidiaries generate sales in foreign currencies and incur costs/expenses in those same foreign currencies, this in accordance with matters discussed in the preceding paragraph, the fluctuations in the exchange rates between the Indonesian Rupiah and other foreign currencies (mainly USD) provides some degree of natural hedge for the Company and Subsidiaries' foreign currency exposure.

As of 30 September 2025 and 31 December 2024 if the Indonesian Rupiah had weakened/strengthened by 1% against the foreign currencies, with all other variables held constant, cash and cash equivalents, trade receivables and trade payables for the periods and years ended 30 September 2025 and 31 December 2024 would have been higher/lower, mainly as a result of foreign exchange gains/ losses on the translation of the net monetary assets and liabilities denominated in foreign currencies with the details are as follows:
