

Responsible, Sustainable, Renewable

Proponents of Forest Sustainability

Forest City Trading Group, LLC is one of the largest lumber and building materials wholesale organizations in North America. We recognize that leadership in the forest products industry carries a responsibility to the environment. Forest City Trading Group, LLC and our subsidiary companies actively support those suppliers who use sustainable forest management practices that promote forest sustainability and result in long-term environmental, social, and economic benefits.

We view the wise and prudent use of renewable resources as a cornerstone to the world's long-term building products needs, and support those firms and organizations that embrace these practices.

It is our intent to inform and educate our employees, customers, and suppliers on those organizations that are developing and promoting forest products certification programs. Accordingly, we recognize the Sustainable Forestry Initiative® (SFI®), Forest Stewardship Council® (FSC®), International Organization for Standardization (ISO), and Canadian Standards Association (CSA) as some of the leading programs using sound, scientifically based management principles in promoting sustainable forestry practices.

As an industry leader, Forest City Trading Group, LLC and its subsidiary companies are committed to promote the conservation and protection of natural resources. Wood products from our forests provide vital benefits and are widely used in all facets of residential and commercial construction, furnishings, and many other applications. We recognize and promote wood as the only all-natural, biodegradable, renewable resource that will provide for our benefit today and for the future.
