

Year 2 Home Learning - 8th January 2026

Science

In Science, we have been identifying different types of materials. Have a look and see what materials you can identify around your home or when you're out and about.

Some examples to look for are wood, metal, glass, plastic, paper, cardboard and rock.

Name the items you find and tell us what material it is made from!

Maths

Complete the task on My Maths. The task is all about our times tables with a focus on the 10 times table.

Spelling

We have taken these words from the Year 2 Common Exception word list. We would like you to practise writing these words at home so you can apply them to your writing in class.
