

Resonance Wave Insole

Introduction

Rich Energy Resonance Wave Insole is a nano-tech functional insole. The Resonance Wave Insole is made of a combination of natural minerals woven into the entire insole. Each mineral produces a specific energy wave and the comprehensive energy wave produces a resonance wave. By inserting the resonance insole, the resonance wave covers and stimulates foot acupoints (Fig. 1).

The feet have more than 60 acupoints, according to foundational Traditional Chinese Medicine texts like the Huangdi Neijing. These points are believed to correspond to specific parts of the body and are thought to be gateways for influencing the body's internal organs and systems.

Stimulating these points may through techniques like Acupuncture or Resonance wave insole to promote the flow of vital energy, enhance blood circulation, and support the body's healing processes.

Metabolic arthritis pain

Metabolic arthritis pain can be relieved through a combination of approaches including lifestyle changes like weight loss and exercise, home remedies such as applying heat or cold, medications like NSAIDs, and Resonance wave sole.

Invest in proper insole is one of the right way to heal arthritis foot pain.

If you live with arthritis, chances are you feel the painful effects in your feet. "Feet are tremendously affected by arthritis.

Research on orthotics and foot pain is limited. According to some study using shoe-stiffening inserts to treat MTP pain found clinically worthwhile improvement in foot pain and foot-related disability over a three-months period, with nearly 80% of participants saying they were effective.

As an alternative to entirely new shoes, you may instead get similar results from inserts that go into your existing footwear to provide the extra support that you need.

Metabolic arthritis pain

Resonance wave insole can help soothe arthritic foot pain:

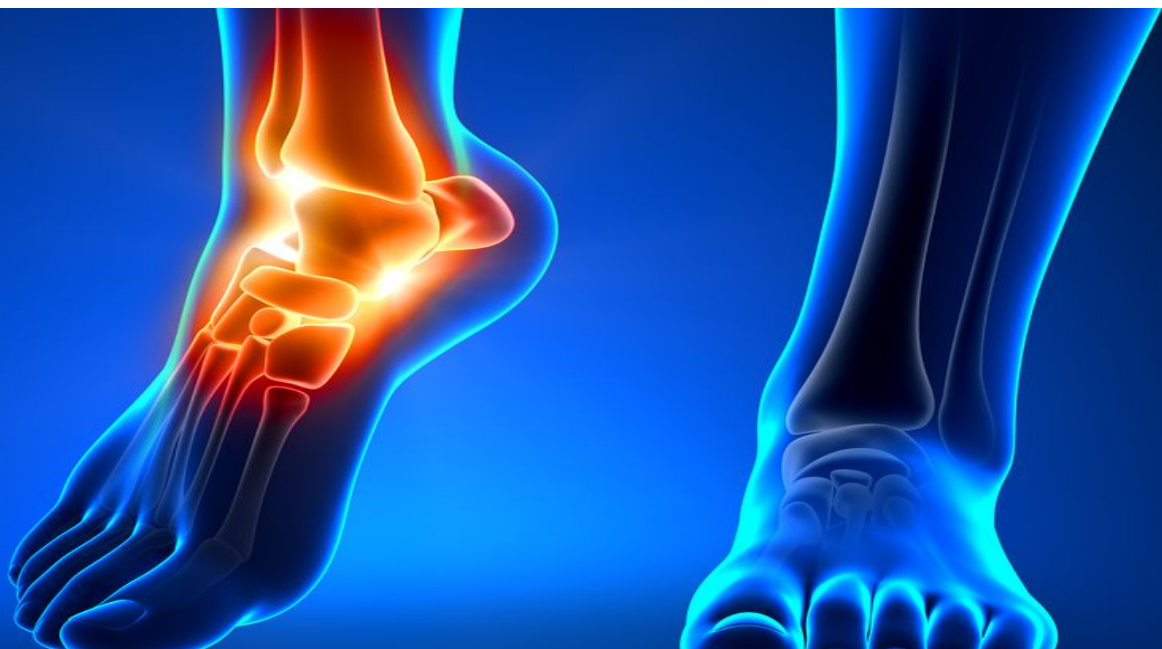

When you have arthritis (Gout), your shoes and insole is either going to help you or hurt you!

Functions of Resonance insole:

Stimulates foot acupoints, relax leg muscles, promote blood circulation, alleviate soreness, fatigue, paralysis, weakness and stiffness, improving kidney function.

Therefore, Resonance wave can effectively stimulate promote blood circulation in both legs, increase blood oxygen content, eliminate fatigue, reduce the symptoms of foot pain, provide stronger support to the upper body and improve the flexibility of movement.

Suitable: Flat feet, high arches, arthritis (Gout), knee pain, foot joint pain, after stroke, athletes.

Athlete functional insole

Athlete version the Momentum booster

it's intended to serve athletes who want to go faster and farther with less effort by giving them more power for everyday movement. We plans to launch a running version by 2026.

Athlete functional insole

Momentum Insoles

In some cases, it helped 12-minute mile runners shave off **1** minute from their time after wearing resonance insole for 30 days. Momentum booster insole is about seamlessly adding a little more power to your stride.

Suitable: athletes, all kind of sports, especially running and hiking.

Maintenance: Maintenance Free, No battery operated.

**“We create
Resonance.”**
