SMART STORAGE FOR KITCHEN APPLIANCES

Technical Support

Product Informationen

Space-saving innovation – maximum flexibility

Thanks to a load capacity of 19 kg, even heavy kitchen appliances such as Thermomix or hot air fryers can be easily swung out of the cabinet and used immediately. After use, simply swing them back into place for more order and free space on the worktop. With the ChefsTable, the worktop remains free without sacrificing quick access to appliances.

Easy installation – perfect for any kitchen

ChefsTable is designed for base cabinets from 400 to 600 mm wide and can be easily retrofitted. The fitting is suitable for installation behind hinged doors - screw on the left and right, attach the synchro rod, attach the work surface - done! A pull-out underneath the ChefsTable can provide additional storage space for accessories.

All product benefits at a glance

- » Creates clear worktops and a clean look
- » Offers a sturdy work surface for devices weighing up to 16 kilogrammes
- » Can easily be retrofitted to existing kitchens

* Max. load capacity: 19 kg (weight of plate plus appliance)

Features

SoftSTOPPplus for damped self-closing.

ChefsTable
