

BeamReaders Speaker & Session Terms

These terms apply to any BeamReaders speaking engagement, presentation, webinar, or 1:1 session booked through BeamReaders, whether delivered by a BeamReaders radiologist or team member. By booking, you agree to the following.

1. Scheduling and delivery. BeamReaders provides the speaker or session host and helps coordinate scheduling. Speakers are oral and maxillofacial radiologists certified by a CODA-approved OMR residency, assigned by BeamReaders based on topic and availability unless otherwise agreed.

2. Fees and payment. All fees are set, invoiced, and collected by BeamReaders. Payment is due prior to the engagement unless otherwise agreed in writing.

3. Cancellation and rescheduling. Requests to cancel or reschedule must be submitted at least 5 business days before the scheduled date for a full refund or credit. Cancellations may be credited toward a rescheduled date at BeamReaders' discretion. BeamReaders may reschedule due to speaker unavailability, with a full refund offered as an alternative.

4. Content and scope. All content is educational and consultative in nature. Sessions and presentations do not constitute patient-specific diagnosis or treatment advice, and no doctor-patient relationship is created with attendees or their patients.

5. Continuing education (when included). Where CE credit is offered, certificates are issued through our CE partner, Big Sky Seminars, and delivered within 1 to 2 weeks of the engagement. By registering for a CE-eligible engagement, you and your attendees expressly authorize BeamReaders to share attendee names, contact information, and attendance records with Big Sky Seminars solely for CE certificate fulfillment. Sessions not including CE credits will not have any data shared with Big Sky Seminars.

6. Recording and materials. Presentation materials remain the property of BeamReaders and the presenting radiologist. Recording, reproduction, or redistribution requires prior written permission from BeamReaders.

7. Privacy. Do not share patient records or protected health information during open sessions or presentations. Case-specific discussions requiring patient imaging should be conducted through the BeamReaders platform.

8. Updates. BeamReaders may update these terms at any time. The version published at time of booking applies.
