TachoScan Control 7.2.4

Changing the default tab opened for Google Maps

(menu: Settings -> Program settings -> Map selection)

(menu: Reports -> Compare driving time and distance on the map)

- When using **Google Maps,** in the window **Compare driving time and distance on the map** the route on the map is displayed by default in the **GNSS places** tab.

Exporting GNSS data to a GPX file

(menu: Reports -> Compare driving time and distance on the map -> Exporting GNSS data to a GPX file)

- A button for exporting GNSS data to a GPX file has been added.

Driver's country of nationality information

(menu: Driver -> Add and Edit)

- Added field **Country of nationality**.

(menu: Control -> Export control to xml)

- Added to **summary.xml** the information in the following sections:
  - Driver:
    - Country of nationality
    - EU citizenship (possible values: EU, non-EU),
    - country of issue of the driver card;
  - Control:
    - Police area,
    - Group,
    - Municipality,
    - Region,
    - Section,
    - Road/Place;
  - Vehicle:
    - Registration nation.

(Poland) Generating violations from the minimum required period by control type

(menu: Reports -> Infringements and manipulations)

- Added automatic calculation of the required percentage of checked days within the control period according to § 3 section 2 point 2. *Regulation of the Minister of Infrastructure of 24 February 2023 on road transport inspections*.
- In the **Report** section, the option **Min 30%** was added for roadside checks and **Min 50%** for company inspections.
  - Next to the above options, the date range representing the required percentage is shown in parentheses.
    - The number of days is always rounded up. *Example: 57 days x 30% = 17.1 = 18 days*.

(France) Integration with VIES

(menu: Company -> Edit)

- Added an integration enabling verification of the TVA number in the VIES database (performed from the company editing window).
  - Inspections concerning companies registered in France require entering and verifying the SIREN number (the **SIREN** field).
  - Inspections concerning companies registered in the European Union require entering and verifying the TVA number (the **Nr. TVA Intra-communautaire** field).
  - Inspections concerning companies not registered in the European Union do not support the verification mechanism.

(Sweden) Roadside Check Form

(menu: Reports -> Roadside Check Form)

- Added the ability to manually modify data before exporting the report to .PDF format for the **Sverige - Standard** inspection.
  - Changes are temporary – after closing the form window and reopening it, all data will be restored to its original state.
  - The exception is fields marked with a pencil icon , where changes are retained.
