OWKIN

DATA ACCESS

Access deep patient data

Richly described multimodal patient data to meet your needs

Owkin's data is different

We provide high-quality, context-rich patient data that can be queried to understand it the way you need.

Our direct partnerships with 100+ leading hospitals in 14 countries give us unparalleled deep data access - made possible through 9+ years of close engagement with clinicians and PIs.

This allows us to collect cutting-edge data modalities along with rich clinical characterization to build unmatched descriptions of each patient.

Cancer and I&I indications

Our products cover a range of cancer and I&I indications, as well as diagnostic specific datasets.

- → NSCLC
- → Breast
- → Bladder
- → Ovarian
- → Gbm
- → Dlbcl
- → CRC
- → H&N
- → Pancreatic
- → Meso
- → Gastric
- → IBD
- → Pancancer (dx)
- → RA

6 Modalities

Combine cutting-edge modalities to address the problem you are interested in.

- → Clinical
- → H&E (+WSI)
- → Bulk RNA
- → WES
- → Single Cell
- → Spatial

Richly described

Retain crucial information to contextualize the data, only possible through collaboration with our academic network.

- → Histological subtype
- → Patient cohort
- → Geographic origin
- → Median follow up time
- → Median age and age range
- → Stage distribution
- → Line of therapy repartition

More variables available on request.
