

ANNECTO / A-MESSAGE

- > A2P (Application to Person) SMS for notifications, transactions, and marketing. Leverage our carrier-grade infrastructure with direct connections to mobile operators, to reach customers globally. We tailor messaging solutions for MNOs, Aggregators, and Enterprise.

- > **Simple** deployment, incorporates into existing workflows, handle all A2P messaging components in one place.
- > Direct and wholesale routes for **any SMS traffic profile**. We send messages over the most efficient, cost-effective routes, and deliver time-critical messages with leading delivery success rates.
- > State-of-the-art **SMS trading** platform.
- > Dashboard with **real-time data**, including messages sent and delivery success rate.
- > High **availability and resilience**, fully redundant architecture in our data centres; highly scalable.
- > **Secure**. SSL and TLS encryption. Connect via HTTP, VPN, SMPP.
- > Anti-spam and Firewall.
- > A-MESSAGE has been developed and deployed on some of the largest mobile networks for more than a decade with very high levels of customer satisfaction.
