

THREATLOCKER®

100 DAYS TO **SECURE** YOUR ENVIRONMENT

Whether you're starting from zero or organizing an inherited environment, this tactical weekly series will walk you through how to fully secure your environment step by step.

Visit threatlocker.com/100days to view each webinar.

WEEK 11 CHECKLIST:

Your next 100 days in office plan: stop as many cyberattacks as possible. Make the life of cybercriminals as difficult as possible without killing the I.T. department's approval rating.

Set up automated responses in your EDR

Use threat levels to remove access to admin tools and sensitive folders

Create a runbook for MDR

Endpoint and Cloud

Be specific on who you want contacted and what to do if no one answers

Check out [Cloud Control](#) to stop unauthorized logins to your M365 tenant

Note: There's also a mobile agent for on-the-go updates

NOTES:
