Course contents

Planetary colloidal mill technology for compounding personalized oral liquid formulations

Extemporaneous oral liquid preparations allow for the adaptation of non-available commercial treatments for specific groups of patients, such as children, the elderly, hospitalized patients, or those intubated or with other special requirements. In this practical course, pharmacist Bruna Marianni shows you the basics of extemporaneous oral liquid preparations and how to improve on the traditional dry-grinding process through a safe and scientifically validated wet milling device.
