FAD: Advanced Bases for Every Skin Type

In this Fagron Academy training session, Bruna Marianni and Dr. Carolina Silva introduce the Fagron Advanced Derma concept, focusing on its pharmaceutical and clinical applications.

The course begins by exploring skin characteristics and the importance of the dermal route for treatment delivery, followed by an overview of various pharmaceutical forms used in dermatology. It also addresses commonly used ingredients in traditional dermatological bases that are now considered unwanted or controversial. The session then presents the Fagron Advanced Derma product line and how it can be used for compounded treatments. Finally, Dr. Carolina highlights common skin conditions and discusses how they can be effectively treated using Fagron Advanced Derma bases in daily clinical practice.
