Dermatology

HRT

Pain

Veterinary

Product Highlights

Letco's Lecithin Organogel is a ready-made mixture of Lecithin and Isopropyl Palmitate. Together they are an absorption enhancer, emulsifier and a solvent. Lecithin Organogel is commonly used with Pluronic Gel 20% or 30% to form a PLO transdermal gel.

- Add to cream base as an absorption enhancer
- Use with Pluronic Gel to form PLO transdermal gel

Ingredients

Lecithin, Isopropyl Palmitate, Sorbic Acid

API Load

Mid (up to 20%)

Specifications

Lecithin Organogel is an orange to brown opaque liquid.

- Specific Gravity: 0.97 g/cm³

Compatible Solvents

Alcohol

Diethylene Glycol
Monoethyl Ether

Propylene Glycol

Purified Water
